together with his colleagues at Citroën André Lefebvre created the traction avant 1934 the tub 1939 Citroën's first front wheel drive utility van that was succeeded by the H and HY vans 1947 the deux chevaux 1948 and last but not least the DS 1955 from 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record breaking automobiles for Voisin he even drove some these cars in races and record attempts it is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer the experience gained during that period gave him the self confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed first he convinced André Citroën later Pierre Michelin then Pierre Jules Boulanger and finally Robert Puiseux and Pierre Bercot his oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century the fact that most present day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators that is why it is amazing that so little is known about this fascinating and brilliant engineer this book was written in order to remedy that and to pay tribute to André Lefebvre the passionate pioneer who left car enthusiasts around the world such an important heritage

building on a wealth of research the automotive industry and the environment addresses current challenges in the automotive industry and how they can be met the authors discuss the development of the automotive industry and the problems it currently faces and consider possible solutions the book reviews trends in more environmental friendly technologies such as the use of more sustainable fuel sources and new types of modular designs with built in recyclability the book also describes new models of decentralized production particularly the micro factory retailing mfr model that provide an alternative to volume production and promise to be both more

sustainable and more profitable

this incisive book integrates the academic fields of sustainable consumption and production scp and sustainable supply chain management sscm as a framework for challenging the current economic paradigm and addressing the significant ecological and environmental problems faced by the contemporary business world

it may seem extraordinary that architects designers of stationary objects should concern themselves with automobile design but the automobile has long touched architects imaginations appearing to them as a house on wheels as mobile accommodation when the motor driven vehicle was invented architects recognised that its image form and function would affect the quality of people s lives and their surroundings and that to propose an automobile was a way to perfect the synthesis of art design and the latest technology a number of well known architects liked to pair the architecture of their houses with their favourite automobiles in order to illustrate the close functional and aesthetic relationship between them some believed that their cars had to look becoming to their architecture and included automobiles in perspective views and photographs of their completed buildings the result being a harmonising composition of the two elements that stressed their close affinity the celebrated ten automobiles exhibition at the museum of modern art new york in 1953 with its proclamation that automobiles are twentieth century artefacts brought into focus the automobile as an influential design object architects realised the importance of the automobile as an icon of an era and sought not only to design motorcars but to apply the principles of automotive technology and design to their architecture this book explores automotive design by leading architects such as frank lloyd wright le corbusier walter gropius marcel breuer adolf loos richard buckminster fuller gio ponti carlo mollino norman foster jan kaplicky and others and its influence on their architecture

the armenian genocide has lately attracted a lot of attention despite the turkish government s attempts at denial it has been developed into a central obstacle to turkey s entry into the european union as such it attracts the highest political and public attention what is largely ignored in the debate however is the fact that armenians were not the only victims of the young turk s genocidal population policies what is still largely forgotten is the murder expulsion and deportation of other ethnic groups like assyrians greeks kurds and arabs by the young turks this not only increases the number of victims but also changes the perspective on the foundation of modern turkey and as such on modern turkish history more generally the thematic issue of the jgr the republication of which is proposed here is the first publication which addresses these wider issues it contributes not only to our understanding of the young turks population and extermination policies in all its complexities and so helping to bring the forgotten victims stories back into genocide scholarship but to our understanding of modern turkey more generally it is an indispensable tool for everybody interested in one of the great historical controversies of our time this book was published as a special issue of the journal of genocide research

vol for 1947 76 indexes car and driver motor trend and road track 1977 81 indexes 15 american automotive journals
