researchers in special education have been developing a knowledge base of evidence based practices that improve the outcomes of students with disabilities unfortunately filtering that knowledge into classrooms implemented by special education teachers has been a challenge in the essentials of special education research andrew m markelz and benjamin s riden directly address the persistent research to practice gap by systematically presenting the essential components of research that every special education teacher must know the first section investigates the foundations of research and why special education teachers should regularly read research articles it also examines the basic structure of research articles to demystify jargon and provide teachers confidence when reading scientific literature the second section explores various research methodologies that consumers of research must know methodologies such as literature reviews single case design quantitative qualitative and others are unpacked so that special education teachers know the critical components of these methodologies along with their limitations to become critical consumers of research the third section focuses on putting this knowledge into practice using practical scenarios the authors demonstrate how a special education teacher can combat common classroom problems by locating and reading relevant research to gain information and implement best practices based on scientific evidence this step by step guide combines the knowledge and skills outlined in this book to truly become a scientific practitioner

for more than 50 years it has been recognized that diet influences cancer formation both in humans and in experimental animals in fact early investigators successfully retarded the onset of tumors in animals by dietary manipulation such findings led to an early optimism that cancer would prove to be yet another disease resulting from dietary imbalances and might thus be amenable to prevention or cure by appropriate nutritional changes subsequent studies showed that the influence of diet on cancer formation was not only very complex it also did not appear to play a direct causative role in carcinogenesis thus during the mid 1950s scientific interest in diet and cancer greatly waned by the early 1970s however a resurging interest in diet and cancer became evident this field of activity has continued to grow yet for over 20 years no comprehensive meeting has been held to summarize the major developments concerning dietary modification of carcinogenesis over a broad range of essential nutrients to fill this void a workshop was held on the role of essential nutrients in carcinogenesis from January 30 to February 1 1985 in Bethesda Maryland under the auspices of the National Cancer Institute this volume is a compilation of the presentations made at that meeting
