seminar paper from the year 2025 in the subject pedagogy nursery pedagogy early childhood education grade 1 0 university of abuja faculty of education language english abstract child centered learning ccl has steadily gained traction as a transformative pedagogical approach that redefines the role of the teacher and the learner grounded in constructivist theories by piaget and vygotsky this approach emphasizes the active participation of learners in the knowledge construction process as educational systems across the globe particularly in the global south grapple with improving academic outcomes child centered learning presents an alternative to the rigid often passive teacher dominated model still dominant in many classrooms this paper explores the impact of ccl on academic achievement in primary schools with a specific focus on nigeria and comparative references to other developing countries drawing from a synthesis of peer reviewed literature classroom based studies national education reports and interviews with educators the paper examines both the pedagogical foundations and practical applications of ccl evidence suggests that ccl not only boosts cognitive outcomes such as critical thinking retention and comprehension but also nurtures social emotional development and learner independence however implementation challenges remain from inadequate teacher training and overcrowded classrooms to culturally entrenched expectations of discipline and performance the paper outlines systemic barriers that hinder the widespread adoption of this learner focused model policy gaps limited instructional resources and infrastructural deficits further complicate its rollout especially in public schools despite these barriers ccl holds significant potential for improving the quality of education and learner outcomes in nigeria and similar contexts this paper concludes by recommending a systemic reform approach that includes curriculum flexibility robust teacher education programs and increased community engagement ultimately embedding child centered principles into everyday classroom practice could be a meaningful step toward

achieving both national education goals and the global education for sustainable development agenda

researching transitions in lifelong learning presents new research from britain australia and north america the authors include leading scholars with established international reputations such as kathryn ecclestone norton grubb david boud and gert biesta as well as emerging researchers with fresh and sometimes challenging perspectives

in the summer of 1956 john mccarthy organized the famous dartmouth conference which is now commonly viewed as the founding event for the field of artificial intelligence during the last 50 years ai has seen a tremendous development and is now a well established scientific discipline all over the world also in europe ai is in excellent shape as witnessed by the large number of high quality papers in this publication in comparison with ecai 2004 there s a strong increase in the relative number of submissions from distributed ai agents and cognitive modelling knowledge representation reasoning is traditionally strong in europe and remains the biggest area of ecai 06 one reason the figures for case based reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of pairs
