the first two editions of this book have been very well received by the community but so many revisions of the maple system have occurred since then that simply reprinting the out of stock book would not do anymore a major revision of the book was inevitable too the wording major revision must be taken seriously because i not only corrected typographical errors rephrased text fragments and updated many examples but i also rewrote complete chapters and added new material in particular the chapter on differential equations now discusses liesymmetry methods partial differential equations and numerical methods linear algebra is based throughout the book on the packages linearalgebra and vectorcalculus which replace the deprecated package linalg maple users are strongly advised to do their work with the new packages the chapter on simplification has been updated and expanded it discusses the use of assumptions in more detail now last but not least a new chapter on grabner basis theory and the groebner package in maple has been added to the book it includes many applications of grabner basis theory many of the maple sessions have been rewritten so that they comply with the most recent version of maple as a result of all this work hardly any section in the book has been left untouched

vi preface to the third edition from the preface of the second edition the first edition of this book has been very well received by the community

as he did in his classic synchronicity joseph jaworski once again takes us on a mind expanding journey this time to the very heart of creativity and deep knowing institutions of all sorts are facing profound change today with complexity increasing at a speed and intensity we ve never experienced before jaworski came to realize that traditional analytical leadership approaches are inadequate for dealing creatively with this complexity to effectively face these challenges leaders need to access the source from which truly profound innovation flows many people including jaworski himself have experienced a connection with this source often when called upon to respond in times of crisis moments of extreme spontaneity and intuitive insight actions simply flow through them seemingly without

any sort of conscious intervention but these experiences are chance occurrences ordinarily we don't know how to access the source and we even have a blind spot as to its very existence in an extraordinarily wide ranging intellectual odyssey jaworski relates his fascinating experiences with quantum physicists cognitive scientists indigenous leaders and spiritual thinkers all focused on getting to the heart of the source ultimately he develops four guiding principles that encompass the nature of the source and what we need to do to stay in dynamic dialogue with it using the combination of narrative and reflection that made synchronicity so compelling jaworski has written a book that illuminates the essential nature not only of visionary leadership but also of relationships consciousness and ultimately reality itself
