this title is directed primarily towards health care professionals outside of the united states for this second edition all chapters have been updated and new concepts incorporated it also contains a new chapter on paediatrics the book continues to be the only one that provides the reader with both the theoretical underpinnings of client centred practice as well as guidance on the practical application of this approach new chapter on paediatrics providing valuable guidance in how to apply this approach new authors writing the mental health chapter giving a different focus that will challenge therapists working with this client group all chapter have been updated to include current literature and current views on the application of a client centred approach chapter on paediatric issues section on the application of the canadian occupational performance measure

it is estimated that at least 60 of persons dying have a prolonged advanced

illness the need for palliative and end of life care will increase due to the rapidly aging world population and the increase of multiple long term conditions for these reasons palliative care is an integral part of public health and public health strategies palliative care as holistic person centered care and has played a critical role in the recent public health emergency of the covid 19 pandemic there is a close association between public health health promotion and palliative care and this research topic will highlight this association through a series of multi disciplinary articles we will explore public health in the context of life limiting illnesses contributing to shaping person centered care including palliative end of life and rehabilitation this research topic will discuss advanced and life limiting illness as a public health challenge and explore the role of palliative and end of life care including rehabilitation in shaping person centered care

principles and concepts of behavioral medicine a global handbook edwin b fisher linda d cameron alan j christensen ulrike ehlert brian oldenburg frank j snoek and yan guo this definitive handbook brings together an international array of experts to present the broad cells to society perspectives of behavioral medicine that complement conventional models of health health care and prevention in addition to applications to assessment diagnosis intervention and management contributors offer innovative prevention and health promotion strategies informed by current knowledge of the mechanisms and pathways of behavior change its range of conceptual and practical topics illustrates the central role of behavior in health at the individual family community and population levels and its increasing importance to person centered care the broad perspectives on risk e g stress lifestyle management issues e g adherence social support and overarching concerns e g inequities health policy makes this reference uniquely global as it addresses the following core areas the range of relationships and pathways between behavior and health knowing in behavioral medicine epistemic foundations key influences on behavior and the relationships among behavior health and illness approaches to changing behavior related to health key areas of application in prevention and disease management interventions to improve

quality of life the contexts of behavioral medicine science and practice principles and concepts of behavioral medicine opens out the contemporary world of behavior and health to enhance the work of behavioral medicine specialists health psychologists public health professionals and policymakers as well as physicians nurses social workers and those in many other fields of health practice around the world

proposals for patient centered care for chronic illness have not understood or incorporated the capacity of patients to be active agents of health and health care patients can not only make treatment choices but help define their clinical problem and its resolution this book examines patient action as the principal path to health and an essential component of it

this excellent book is the definitive work on an old but still evolving concept what impressed me most about the book is that the authors practice what they preach the reader is treated the same way that the authors exhort us to treat our patients with respect tolerance understanding and caring canadian medical association this book is a concise description of a patient centered model of patient communication written for clinicians educators and researchers there are six key elements in the authors model each of which is illustrated by one or more clinical vignettes the purpose is to describe and explore a model of physician patient communication that emphasizes patients needs rather than the traditional medical model for the purpose of education and research on patient centered medicine the authors clearly achieve the objective of describing and explaining their model doody s health sciences book review journal this book provides an excellent discussion of many of the issues related to patient centered medicine the authors outline the six interacting components which are the assessment of disease and illness the integration of that assessment with the understanding of the whole person finding common ground between the doctor and the patient using each visit as an opportunity to build on the relationship prevention and promotion and throughout the process being realistic concerning

the time resources and energy needed because occupational therapists work as members of a multidisciplinary team this text is an excellent overview and discussion of the position of another discipline on issues related to patient centered practice as such it broadens our understanding of the implications of applying this approach british journal of occupational therapy the evolution of attitudes and roles in society are reflected in many facets of our lives in the medical community these changes are most evident in the shifting relationship between doctor and patient confronted with the demand for more egalitarian approaches to health care physicians may find themselves ill prepared to accept and participate in this redefinition of traditional medical practice in patient centered medicine the authors present a six component model to assist health practitioners in expanding and strengthening their relationships with patients thoughtful discussions present topics as diverse as conceptualizations of ill health consideration of the patient as an individual the establishment of goals and cooperative strategy between physician and patient and the realistic allocation of time energy and other resources of the health care provider emphasizing a holistic philosophy the work encourages physicians to surpass treatment based strictly on a one dimensional biomedical assessment of their patients and thus achieve greater results professionals and advanced students in all health care fields will appreciate this illuminating and provocative volume

peggy natiello s collection of work has become a favourite amongst students on person centred courses throughout the uk it is a scholarly much referenced work on collaborative power and gender issues
