the writing of this book perspective on analytical writing a focus on feature and editorial writing is based on the urge for students majoring in mass communication on the african continent particularly those within the economic community of west african states ecowas to have a simplistic understanding of the course feature and editorial writing it will be oblivious or a

miss calculation to say that there are no texts books on feature and editorial writing on the african continent since i have not had the opportunity to extensively travel within africa but what could be safely said is for over three decades since i completed my under graduate studies i have not seen a text book on feature and editorial writing readily based on this experience the book first endeavored in its starting to give students an insight on what an analytical writing is beginning with a drill on perspective and gave a detailed and vivid picture of perspective thereby laying the basis to understanding what feature and editorial writing is all about although the core focus of the book is on feature and editorial writing but as the title depicts perspectives on analytical writing more emphases are placed on perspective and analytical writing in order to provide a deeper understanding for the students as a foundation to grasp the concept of feature and editorial writing also the book featured research as a component to writing an appreciable feature and editorial piece added to research other ingredients for writing good feature and editorials are also considered they include opinion persuasion and propaganda furthermore since feature and editorial writings are within the scope of mass communication and journalism it became imperative for the book to touch on the ethical aspect of the profession aimed at providing students the barometer of knowing what to do and not what to do while writing feature and editorial pieces in its conclusive stage the book dealt with the impact of editorial on political actors as it relates to their involvement in the process of national development as you will come across in your reading mass communication and journalism are catalysts to agenda setting in any society therefore it is expected that stakeholders particularly those involved in the governance process of our countries in africa to take clue from editorial articles especially those that advocate for positive change to propel them to respond to the developmental needs of africa now let s be practical and reflect on a simple analogy referencing a performance by a group of movie stars such as the late popular comedian peter ballah of liberia kekura kamara with his popular movie malawala balawala of liberia salla kamara with his movie blood diamond of sierra leone mr ibu john okafor with the show mr ebu and his son of nigeria or john dumelo with the movie the tie that binds of ghana as these movie stars are performing in their movies the viewers are fascinated with emotion amusement and are thrilled by the performances while in their seats in the theatre movie hall or in their various homes just as the emotion of viewers is intrigued by the performances or movies so feature and editorial write ups are replica to evoking the emotion of the readers the articles must create a scenario of curiosity to arouse or entice the readers this is the drama in feature and editorial writing

while identifying two types of activity namely econ art and econ science he demonstrates why economists should acknowledge their artistic impulses and develop a more scientific conduct artbibliographies modern historians of economic thought have long recognised the possibility that cultural influences might be important but have never analysed them in any detail in the first study of economics from the perspective of art history rick szostak shows how the cultural influences identified by art historians have affected economic theory he also reveals that not only has economic theory been informed by aesthetic considerations but the very methods employed by economists are shown to serve primarily artistic goals professor szostak assesses the extent of these cultural and aesthetic effects through a wide ranging study of the development of surrealism cubism and abstract art juxtaposed with examples drawn from virtually every field of economics

two types of endeavour are identified econ art and econ science szostak argues that the pursuit of econ science would be much aided if economists first recognised their artistic impulses and then developed more scientific standards of conduct as the first economist to thoroughly address the question of whether economics is art professor szostak raises some important philosophical issues with this volume the result is a controversial and scholarly yet accessible examination of the influence of both culture and aesthetic considerations on economics

in recent decades new testament scholarship has developed an increasing interest in how the gospel of john interacts with literary conventions of genre and form in the ancient jewish and greco roman context the present volume brings together leading scholars in the field in order to discuss the status quaestionis and to identify new exegetical frontiers in the fourth gospel genres and forms serve as vehicles of ideological and theological meaning the contributions to this volume aim at demonstrating how awareness of ancient and modern genre theories and practices advances our understanding of the fourth gospel both in terms of the text as a whole gospel ancient biography drama romance etc and in terms of the various literary tiles that contribute to the gospel s genre mosaic

numero extraordinario with 1972

the first edition of this book published in 1994 began with the statement that the new science of complexity would characterize the scientific develop ment of the 21st century in the first decade of this century this prediction has been confirmed by overwhelming new empirical results and theoretical insights the of physical and biological sciences cognitive and computer sci ences and social and economic sciences complexity and nonlinearity are still prominent features in the evolution of matter mind and human society thus the science of complexity still aims at explanations for the emergence of order in nature and mind and in the economy and society by common principles but a new engineering view has focused the exploration of complexity on the one hand we need new computational instruments to analyze com plex data and recognize future trends on the other hand the principles of complex dynamics are increasingly becoming the blueprints of gene bio and computer technology life and computer sciences are growing into a new kind of complex engineering changing the basic conditions of human life and society nonlinear dynamics are implemented in nonlinear computer chips of high speed and miniaturized size which are not only distributed in our technical equipment and environment but also in our body and brain
