essay from the year 2014 in the subject leadership and human resources miscellaneous grade 1 0 university of applied sciences dresden language english abstract is part time work the key to happier families empirical findings on job satisfaction and personal happiness of part time workers over the last decades there has been a large increase of women in jobs and hence an increase in dual earner households consequently a significantly higher amount of stress and pressure on men and women has been observed as it is difficult to combine the duties at work and at home which can reduce the overall quality of life and threat the work life balance for many people part time work can be a solution to this problem especially in industrial nations by definition an employee works part time if he regularly works fewer hours than a comparable full time employee the number of hours varies from state to state and institution to institution however there has been an increase in part time work also in traditionally full time professions in europe about 32 of all women and 8 of men work part time though this rate is lowest in eastern countries and highest in northern and western countries in the usa about 23 of employees work part time but does part time employment really increase the personal and work satisfaction why is the

satisfaction higher or lower and what are benefits and disadvantages of part time work moreover what determines the satisfaction in part time arrangements apart from influences of work and personal life

the twin cities metropolitan area was selected to participate in a federal transportation initiative called the urban partnership program this required the formation of a multi agency collaboration of transportation focused groups in the twin cities area this collaboration including the external forces affecting it the internal processes structures and competencies that allowed it to operate and its accountability mechanisms is the focus of this analysis confirming lessons found in the collaboration literature the minnesota upa is a complex assembly of human individuals and relationships and non human technologies artifacts laws and procedures elements therefore it is not an easy answer to hard problems but a hard answer to hard problems the research highlights some new findings most notably the role of technology linkages connecting high level federal policymaking to local operational implementation details emphasis on multiple roles played by sponsors champions neutral conveners process designers and technical experts importance of specific competencies the role of rules and routines as drivers of collaboration and the importance of spatial and temporal organizational ambidexterity it is important to note that the work of this collaboration thus far has been virtually invisible to the public but that will change in the upcoming stages of upa implementation

the text presents a systematic behavioral model that underlies crisis management showing which personality functions are required for managing and preparing for major crises the book discusses the extreme importance of emotional iq in handling responding and preparing for any crisis crisis leadership presents the findings from new national surveys and new concrete easy to understand models for implementing programs of proactive leadership the combination of models including a comprehensive look at what happens before during and after a crisis creates a truly integrated and systematic approach
