this is a bright comedy by the famous english comic playwright
about the extraordinary powers of ernie fraser a dreamer with a
difference ernie has a vivid imagination and his thoughts have
the disconcerting habit of turning into reality

a treat to read and a joy to perform this second collection of
alan ayckbourn s work is a cornucopia of some of his wonderfully
inventive children s plays from the story of the teenage lucy in
invisible friends who revives her childhood imaginary friend when
things get difficult at home onto the storytellers in my very own
story and this is where we came in and finally to young ernie who
illucinates all sorts of wild and weird happenings with

astonishing results

a dictionary of hallucinations is designed to serve as a reference manual for neuroscientists psychiatrists psychiatric residents psychologists neurologists historians of psychiatry general practitioners and academics dealing professionally with concepts of hallucinations and other sensory deceptions

hallucinations can occur across the five sensory modalities auditory visual olfactory tactile and gustatory whilst they have the potential to be benign or even highly valued they can often be devastating experiences associated with distress impaired social and occupational functioning self harm and suicide those who experience hallucinations in this latter manner may do so within the context of a wide range of psychiatric diagnoses including schizophrenia bipolar disorder borderline personality disorder and post traumatic stress disorder the only routinely available interventions for people distressed by hallucinations are antipsychotic drugs which date from the introduction of chlorpromazine in the 1950s and manualized cognitive behavioral therapy which originated in the 1990s these interventions do not help all people distressed by hallucinations and in the case of antipsychotic medication come with notable side effects there has hence been great interest in new interventions to support people distressed by hallucinations the goal of this frontiers research topic is to present a collection of papers on new developments in clinical interventions for those distressed by hallucinations in the psychiatric condition that remains most strongly associated with hallucinations schizophrenia the majority 70 of people will have experienced hallucinations in the auditory modality approximately a third will have experienced visual hallucinations and a smaller minority will have experienced hallucinations in other modalities consistent with this prevalence this collection focusses on auditory and visual hallucinations this is not to minimise the potential distress that can occur from hallucinations in other modalities for example tactile hallucinations particularly when stemming from earlier experiences of sexual abuse can be highly distressing and improved ways to help sufferers of such experiences are also needed in summary this collection aims to result in an interdisciplinary collection of papers which will appeal to a wide readership spanning all with an interest in this area
