once again unfettered capitalism has failed promises for global prosperity and peace have given way to a world of deep recession social upheaval and political instability once again mainstream economics has proved its inadequacy despite its technical rigour and

mathematical virtuosity it failed dramatically to respond to the current crisis why is this so mainstream economics turns a blind eye to society by assumption it maims its analyses by wiping away what makes us what we are there is pressing need for a critical discussion and new ideas we therefore turn to the insightful and stimulating work of pierre bourdieu arguably one of the major sociologists ever he was also a major economist yet his works on the economy have received only scant attention especially from economists be they mainstream or heterodox bourdieu helps to take a broader view and enrich our scientific imagination by including dimensions of power intuitive behaviour and social structures within the scope of his analysis he provides for an alternative foundation of economics based on an integrated interdisciplinary theory for the first time this volume fills this gap in economics by featuring state of the art research and experts from different social science disciplines this book constitutes a first step and hopes to become a milestone the book offers an innovative outlook and a unique source for social scientists of all fields particularly economists and sociologists who wish to engage in the study of bourdieu and his economics with a view to developing a more pertinent theory it will also constitute a useful reference for university students and administrators who would like to explore the economy from a bourdieusian perspective

this book explores the lived experiences of boxers in a french banlieue largely populated by people from working class and immigrant backgrounds jérôme beauchez who joined in the men's daily workouts for many years analyzes the act of boxing as a high stakes confrontation that extends well beyond the walls of the gym exploring the physical and existential realities of combat the author provides a multifaceted thick description of this world and shows that the violence faced by the gym's members is not so much to be found in the ring as in the adversity of everyday racism and social exclusion boxing can therefore be understood as an act of resistance that is about more than simply fighting an opponent and that reflects all the existential struggles facing these men who are both stigmatized and socially dominated by race and class
