this book contains the proceedings of the international astronomical union colloquium no 195 held in torino italy in 2004 the meeting investigated the formation of galaxies within a full cosmological context focusing on the outer regions of galaxy clusters the observed correlation of optical and radio properties of galaxies with their environment indicates that the formation and evolution of galaxies is intimately linked to the formation of large scale structure with chapters written by leading authorities in the field this timely volume investigates the role of the environment in determining the properties of galaxies it describes the distribution of matter and galaxies on the largest scales in the universe the processes of cluster and galaxy formation their role and interplay this is a valuable collection of review articles for professional astronomers

thirty years ago a new linguistic paradigm was created when einar haugen for the first time combined language with ecology for haugen the ecology of language meant the study of the interrelations between languages in the human mind and in the multilingual community since then a special branch of linguistics named ecolinguistics has developed in which the connection between language and ecology has been established in a variety of ways and by using a multitude of methods and approaches this reader contains important articles from all the different fields of ecolinguistics a volume long overdue for a discipline now recognized as a significant contribution to variety within the subject

for this volume 30 well known linguistics and researcher in related fields were invited to present an overview of their most important insights and theories as these have evolved over the past 30 years against the background of work done in other areas of study the contributors reflect on the development of their ideas the book shows what progress has been made and how priorities have shifted these past decades by placing current ideas in a wider historical perspective thirty years of linguistics evolution will become a unique instrument for future generations of linguists to gain insight into the overall trends and problems that have dominated linguistics in the second half of the 20th century the impressive contributions to this volume provide a glowing and appropriate testimonial to the many years of effort which rené dirven has devoted to linguistic research and to the forging of contacts between scholars all over the world the topics are wide ranging the titles intriguing

the content challenging the whole has been scrupulously edited by martin pütz to provide a book which i am sure will be of considerable interest and value to scholars and students alike david crystal bangor wales

vol 36 include calendario delle riunioni e dei congressi
