the field of behavioural economics can tell us a great deal about cognitive bias and unconscious decision making challenging the orthodox economic model whereby consumers make rational and informed choices but it is in the arena of health that it perhaps offers individuals and governments the most value in this important new book the most pernicious health issues we face today are examined through a behavioral economic lens it provides an essential and timely overview of how this growing field of study can reframe and offer solutions to some of the biggest health issues of our age the book opens with an overview of the core theoretical concepts after which each chapter assesses how behavioral economic research and practice can inform public policy across a range of health issues including chapters on tobacco alcohol and drug use physical activity dietary intake cancer screening and sexual health the book integrates the key insights from the field to both developed and developing nations also asking important ethical questions around paternalism and informed choice this book will be essential reading for students and researchers across psychology economics and business and management as well as public health professionals wishing for a concise overview of the role behavioral economics can potentially play in allowing people to live healthier lives

macroeconomic policies have devastating effects on the environment they shape the economic processes that drive deforestation soil erosion the exhaustion of living marine resources greenhouse gas emissions and the massive loss of biodiversity despite this the vital connection between macroeconomic policies and the environment has thus far received little attention by the academic and the policy making communities rethinking macroeconomics for sustainability reveals the

linkages between monetary financial and fiscal policies and the environmental degradation that threatens the planet's biosphere in doing so it examines the complex lines of transmission from policy priorities all the way down to the effects at the local level as well as analyzing the deep seated relationship between macroeconomic policy models and their impacts on growth peoples livelihoods and the environment besides exploring the relation between macroeconomic and climate change policies as well as efforts to green the world economy the book considers five key case studies in latin american economies going beyond this it also sets out specific policy recommendations both at the national and international levels all this is based on the incontrovertible premise that macroeconomic policies must to be redesigned in order to attain long term sustainability objectives and that monetary and fiscal policies are as important for environmental stewardship as they are for growth and prosperity

this textbook connects three vibrant areas at the interface between economics and computer science algorithmic game theory computational social choice and fair division it thus offers an interdisciplinary treatment of collective decision making from an economic and computational perspective part i introduces to algorithmic game theory focusing on both noncooperative and cooperative game theory part ii introduces to computational social choice focusing on both preference aggregation voting and judgment aggregation part iii introduces to fair division focusing on the division of both a single divisible resource cake cutting and multiple indivisible and unshareable resources multiagent resource allocation in all these parts much weight is given to the algorithmic and complexity theoretic aspects of problems arising in these areas and the interconnections between the three parts are of central interest

a result of more than four decades of teaching experience this book deals with the problems of economic growth development and eradication of poverty and unemployment the book also includes an analytical study of important issues of environment and sustainable development the book not only explains the models and theories of economic growth but also critically evaluates their relevance to developing countries a major highlight of discussion in the context is the exploration of the widely accepted amartya sen's capability approach to development

the book provides conceptual understanding of essential concepts in business life it details the foundations of business economics with special emphasis on demand analysis and consumer behaviour it also discusses analysis of production and cost of the firm market structures and pricing of products factor pricing and income distribution and concludes with the discussion of capital budgeting based on the author's extensive teaching experience the book champions a collaborative approach

to delivering an appropriate textbook that is curriculum relevant

vols include proceedings of the conference of the indian society of agricultural economics

acclaim for the 2011 edition the global entrepreneurship and development index focuses on high growth companies it tries to measure the ambition of entrepreneurs as well as the prevalence of start ups it presents its results in ways that are designed to capture the attention of policymakers it produces a ranking of 71 countries for all their faults nothing makes a politician jump like a league table it also identifies bottlenecks that prevent countries from doing better the index concludes that development and enterprise are correlated the economist the global entrepreneurship and development index both captures the context features of entrepreneurship and fills a gap in the measurement of development building on recent advances in entrepreneurship and economic development the authors have created an index that offers a measure of the quality of the business formation process in 118 of the most important countries in the world the authors expertly capture the contextual feature of entrepreneurship by focusing on entrepreneurial attitudes entrepreneurial abilities and entrepreneurial aspirations the data and their contribution to the business formation process are supported by three decades of research into entrepreneurship across a host of countries the unique index construction of individual and institutional measures integrates 31 variables from various data sources into 14 pillars three sub indexes and a super index the relationship between entrepreneurship and economic development appears to be more or less mildly s shaped the findings suggest moving away from simple measures of entrepreneurship across countries illustrating a u shaped or l shaped relationship to more complex measures which are positively related to development the model has important implications for development policy this unique book will be invaluable for researchers policymakers and entrepreneurs keen to expand their understanding of entrepreneurship and development

contributed articles presented at the 83rd annual conference of indian economic association held at jammu during 2000 2001
