gis a sourcebook for schools is an easily accessible guide to gis at an elementary level and provides sufficient background in gis to ensure a comprehensive working knowledge of the subject it is written specifically for schoolteachers looking to incorporate gis into the secondary school

curriculum and will be the essential textbook for all those wishing to gain an introduction to a working knowledge of GIS the book contains everything that a teacher wanting to implement GIS into the curriculum would need including glossary of terms explanation of the fundamentals definitions and further reading no other book will be quite as useful as this one

What are the unconscious processes involved in reading literature? How does literature influence our psychological development and existential challenges? A psychoanalytic perspective on reading literature offers a unique glimpse into the unconscious psychic processes and development involved in reading. The author listens to the free associations of various literary characters in numerous scenarios where the characters are themselves reading literature, thus revealing the mysterious ways in which reading literature helps us and contributes to our development. The book offers an introduction both to classic literature (Poe, Proust, Sartre, Semprún, Pessoa, Agnon) and more, and to the major psychoanalytic concepts that can be used in reading it. All is described and widely explained before being used as tools for interpreting the literary illustrations. The book thus offers a rich lexical psychoanalytic source alongside its main aim in analysing the reader's psychological mechanisms and development. Psychoanalytic interpretation of those literary readers opens three main avenues to the reader's experience: the transference relations toward the literary characters; the literary work as means to transcend beyond the reader's self-identity and existential boundaries; and mobilization of internal dialectic tensions towards new integration and psychic equilibrium. An epilogue concludes by emphasising the transformational power embedded in reading literature. The fascinating dialogue between literature and psychoanalysis illuminates hitherto concealed aspects of each discipline and contributes to new insights in both fields. A psychoanalytic perspective on reading literature will be of great interest not only to psychoanalytic psychotherapists and literature scholars but also to a wider readership beyond these areas of study.

The field of reading is a compelling one characterised by many debates and discussions. It is also amenable to investigations through a range of theories and research studies. In this book, eight leading authorities provide a state-of-the-art overview of reading using perspectives that have informed their work. There are overviews from linguistic, psychological, sociological, and literary viewpoints, as well as more hybrid ones from investigations of digital literacy and multi-modality. This book celebrates what has already been achieved by bridging research, scholarship, and practice. It also suggests what still needs to be done to bring the positive rewards from reading to greater numbers of young people. It also recognises that the benefits of reading extend beyond the personal: accomplished reading skills empower people to meet the challenges of everyday life, making decisions, solving problems, and dealing with unexpected events. The need to refresh and renew our knowledge of reading has gained further impetus in the information age: new technologies for information and communication continually appear; manifestations of fake news, disinformation, and conspiracy theories spread rapidly across the globe. The book underlines the importance not only of reading but also the fact that reading between and beyond the lines is more important than ever. In print and across multiple media platforms, the chapters in this book were originally published as a special issue of *Education 3-13: International Journal of Primary, Elementary, and Early Years Education*.

Although film studies has successfully returned attention to matters of style and interpretation, its

sibling discipline has left the territory uncharted until now the question of how television operates on a stylistic level has been critically underexplored despite being fundamental to our viewing experience this significant new work redresses a vital gap in television studies by engaging with the stylistic dynamics of tv exploring the aesthetic properties and values of both the medium and particular types of output specific programmes and raising important questions about the way we judge television as both cultural artifact and art form television aesthetics and style provides a unique and vital intervention in the field raising key questions about television s artistic properties and possibilities through a series of case studies by internationally renowned scholars the collection takes a radical step forward in understanding tv s stylistic achievements
