across america crime is a consistent public concern the authors have produced a comprehensive work on major criminological theories combining classical criminology with new topics such as internet crime and terrorism the text also focuses on how

criminology shapes public policy

around the world and across a range of contexts homelessness among older people is on the rise in spite of growing media attention and new academic research on the issue older people often remain unrecognized as a subpopulation in public policy programs and homeless strategies as such they occupy a paradoxical position of being hypervisible while remaining overlooked late life homelessness is the first canadian book to address this often neglected issue basing her analysis on a four year ethnographic study of late life homelessness in montreal canada amanda grenier uses a critical gerontological perspective to explore life at the intersection of aging and homelessness she draws attention to disadvantage over time and how the condition of being unhoused disrupts a person s ability to age in place resulting in experiences of unequal aging weaving together findings from policy documents stakeholder insights and observations and interviews with older people this book demonstrates how structures organizational practices and relationships related to homelessness and aging come to shape late life situated in the context of an aging population rising inequality and declining social commitments late life homelessness stresses the moral imperative of responding justly to the needs of older people as a means of mitigating the unequal aging of unhoused elders

as china has undergone rapid urbanization and population aging in the past few decades improving the welfare of older people in rural areas has become an ever more pressing issue this title is the first book length work to examine the influence of urbanization on the mental health of china s older population outside the city incorporating the theoretical framework of social ecology the author analyzes the socio cultural factors that have exerted an impact on participants mental health such as their personal life course transition changes to family living arrangements and community restructuring moreover he introduces several elderly mental health intervention models in china while evaluating the policy initiatives that have developed based on china s local resource sufficiency cultural customs and older people s needs the research findings not only facilitate a deeper understanding of china s welfare policy making but also offers a useful reference for countries that are experiencing similar urbanization and population aging and that wish to formulate better social policies students and scholars of social policy welfare and gerontology will find this title to be essential reading

this upper level textbook provides a coherent introduction to the economic implications of individual and population ageing placing economic considerations into a wider social

sciences context this is ideal reading not only for advanced undergraduate and masters students in economics health economics and the economics of ageing but also policy makers students professionals and practitioners in gerontology sociology health related sciences and social care this volume introduces the different conceptualisations of age and definitions of old age as well as the main theories of individual ageing as developed in the disciplines of biology psychology and sociology it covers the economic theories of fertility mortality and migration and describes the four main frameworks that can be used to study economics and ageing namely the life cycle the overlapping generations the perpetual youth and the dynastic models

the developmental science of adolescence history through autobiography is the most authoritative account of the leading developmental scientists from around the world written by the scholars who shaped the history they are recounting each chapter is an engaging and personal account of the past present and future direction of the field no other reference work has this degree of authenticity in presenting the best developmental science of adolescence the book includes a foreword by saths cooper president of the international union of psychological science and autobiographical chapters by the following leading developmental scientists jeffrey jensen arnett robert wm blum jeanne brooks gunn b bradford brown marlis buchmann john bynner john coleman rand d conger james e côté william damon sanford m dornbusch nancy eisenberg glen h elder jr david p farrington helmut fend andrew j fuligni frank f furstenberg beatrix a hamburg stephen f hamilton karen hein klaus hurrelmann richard jessor daniel p keating reed w larson richard m lerner iris f litt david magnusson rolf oerter daniel offer augusto palmonari anne c petersen lea pulkkinen jean e rhodes linda m richter hans dieter rösler michael rutter ritch c savin williams john schulenberg lonnie r sherrod rainer k silbereisen judith g smetana margaret beale spencer laurence steinberg elizabeth j susman richard e tremblay suman verma and bruna zani

behavioral medicine emerged in the 1970s as the interdisciplinary field concerned with the integration of behavioral psychosocial and biomedical science knowledge relevant to the understanding of health and illness and the application of this knowledge to prevention diagnosis treatment and rehabilitation recent years have witnessed an enormous diversification of behavioral medicine with new sciences such as genetics life course epidemiology and new technologies such as neuroimaging coming into play this book brings together such new developments by providing an up to date compendium of methods and applications drawn from the broad range of behavioral medicine research

and practice the book is divided into 10 sections that address key fields in behavioral medicine each section begins with one or two methodological or conceptual chapters followed by contributions that address substantive topics within that field major health problems such as cardiovascular disease cancer hiv aids and obesity are explored from multiple perspectives the aim is to present behavioral medicine as an integrative discipline involving diverse methodologies and paradigms that converge on health and well being
