bold conscience chronicles the shifting conception of conscience in early modern england as it evolved from a faculty of restraint what the author labels cowardly conscience to one of bold and forthright self assertion caught at the vortex of public and private concerns the concept of the conscience played an important role in post reformation england from clerical leaders on down to laymen not least because of its central place in determining loyalties during the english civil war and the consequent regicide of king charles i yet within this mix of perspectives the most sinuous complex and ultimately lasting perspectives on bold conscience emerge from deliberately literary rhetorically artistic voices shakespeare donne and milton joshua held argues that literary texts by these authors in re casting the idea of conscience as a private interior shameful state to one of boldness fit for the public realm parallel a historical development in which the conscience becomes a platform both for

royal power and for common dissent in post reformation england with the 1649 regicide of king charles i as a fulcrum that unites both literary and historical timelines held tracks the increasing power of the conscience from william shakespeare s hamlet and henry viii to john donne s court sermons and finally to milton s areopagitica and charles s defense of his kingship eikon basilike in a direct attack on eikon basilike milton destroys the prerogative of the royal conscience in eikonoklastes and later in paradise lost proposes an alternative basis for inner confidence rooting it not in divine right but in the paradise within a metonym for conscience applying a fine grain literary analysis to literary england from about 1601 to 1667 this study looks backward as well to the theological foundations of the concept in luther of the 1520s and forward to its transformation by locke into the term consciousness in 1689 ultimately held s study shows how the idea of a conscience in early modern england long central to the private self and linked to the will memory and mind emerges as a nexus between the private self and the realm of public action a bulwark against absolute sovereignty and its attenuation as a means of more limited personal certainty whether in milton s struggle against king charles or hamlet s against king claudius the conscience born of the reformation becomes less a state of inner critique and more a form of outward expression fit for the communal life and commitments demanded by the early modern era
