in astrological terms the prenatal epoch starts at the moment of conception according to the author the prenatal epoch is a certain moment of time occurring approximately at the commencement of the gestative period when the degree ascending on the eastern horizon and the longitude of the moon thereat interchange with the longitude of the moon and the degree ascending at birth or their respective opposite points pg 19 what this means is that your prenatal moon was your birth ascendant and your prenatal ascendant is your birth moon or the opposite points in the zodiac there are four possibilities if the natal moon is above or below the horizon at birth and if it is increasing or decreasing in light so what good is this for one thing it helps explain infant abnormalities as well as infant mortality in cases where there are no other astrological factors it also aids in reading charts for multiple births twins triplets quads and quintos closely allied to the prenatal epoch is the law of polarity or sex properly calculated the prenatal epoch will not only confirm the sex of the individual it will also serve to rectify the birth time itself unlike other methods of rectification where absurdly large time changes can result prenatal epoch calculations correct minor errors in clock time thus enabling greater precision in forecasting

scientists in the late twentieth century are not the first to view galaxy formation as a phenomenon worthy of explanation in terms of the known laws of physics already in 1754 kant regarded the problem as essentially solved in his universal natural history and theory of the heavens he wrote if in the immeasurable space in which all the suns of the milky way have formed themselves we assume a point around which through some cause or other the first formation of nature out of chaos began there the largest mass and a body of extraordinary attraction will have arisen which has thereby become capable of compelling all the systems in the process of being formed within an enormous sphere around it to fall towards itself as their centre and to build up a system around it on the great scale observation puts this conjecture almost beyond doubt more than 200 years later a similar note of confidence was voiced by zel dovich at an iau symposium held in tallinn in 1911 extrapolating to the next symposium somewhere in the early eighties one can be pretty sure that the question of the formation of galaxies and clusters will be solved in the next few years perhaps few astronomers today would share kant's near certainty or feel that zel dovich's prophecy has been fulfilled many however will sympathize with the optimistic outlook of these two statements
