in academia the effects of the cultural turn have been felt deeply in everyday life tenets from cultural politics have influenced how people behave or regard their options for action such as the reconfiguration of social movements protests and praxis in general many authors writing in this field are known for their scholarship and social

activism both of which are arguably guided by principles of cultural politics about the nature of representation and the deployment of power in political discourses the handbook of cultural politics and education is less an attempt to standardize contemporary educational scholarship and more a collection that engages the problems and promises of recent themes in social and cultural thought which require our attention and demand a response in other words it opens doors to questions rather than convenient answers to difficult educational dilemmas the handbook is part of the appraisal of an opening created by interdisciplinary writings on such themes as representation civil society cultural struggle subjectivity and media within the context of education indeed cultural politics troubles traditional frameworks in search of critical explanations concerning education's place within society the contributions in the collection support this endeavor

whether in the domains of scholarship or practice important advances have been made in recent years in our understanding of how culture politics and development interact today's leading theorists of culture and development represent a fourth distinctive perspective vis-à-vis their predecessors one that seeks to provide an empirically grounded mechanisms based account of how symbols frames identities and narratives are deployed as part of a broader repertoire of cultural tools connecting structure and agency a central virtue of this approach is less the broad policy prescriptions to which it gives rise indeed to offer such prescriptions would be something of a contradiction in terms than the emphasis it places on making intensive and extensive commitments to engaging with the idiosyncrasies of local contexts deep knowledge of contextual realities can contribute constructively to development policy by enabling careful intra country comparisons to be made of the conditions under which variable responses to otherwise similar problems emerge such knowledge is also important for discerning the generalizability or external validity of claims regarding the efficacy of development interventions especially those overtly engaging with social legal and political issues

mandarin chinese and the increasing subordination of the hoklo majority culture in ethnic policy and public identity discourses a number of initiatives have been undertaken toward the revitalization and recognition of minority cultures at the same time however the hoklo majority culture has become akin to a political taboo this book examines how the interplay of ethnicity national identity and party politics has shaped current debates on national culture and linguistic recognition in taiwan it suggests that the ethnolinguistic distribution of the electorate has led parties to adopt distinctive strategies in an attempt to broaden their ethnic support bases on the one hand the dpp and the kmt have strived to play down their respective de sinicization and sinicization ideologies as well as their hoklo and chinese ethnocultural cores at the same time the parties have competed to portray themselves as the legitimate protectors of minority interests by promoting hakka and aboriginal cultures these concomitant logics have discouraged parties from appealing to ethnonationalist rhetoric prompting them to express their antagonistic ideologies of taiwanese and chinese nationalism through more liberal conceptions of language rights therefore the book argues that constraints to cultural and linguistic recognition in taiwan are shaped by political rather than cultural and sociolinguistic factors investigating taiwan s counterintuitive ethnolinguistic situation this book makes an important theoretical contribution to the literature to many fields of study and will appeal to scholars of taiwanese politics sociolinguistics culture and history
