as brazil and other countries in latin america turned away from their authoritarian past and began the transition to democracy in the 1980s and 1990s interest in developing new institutions to bring the benefits of democracy to the citizens in the lower socioeconomic strata intensified and a number of experiments were undertaken perhaps the one receiving the most attention has been participatory budgeting pb first launched in the southern brazilian city of porto alegre in 1989 by a coalition of civil society activists and workers party officials pb quickly spread to more than 250 other municipalities in the country and it has since been adopted in more than twenty

countries worldwide most of the scholarly literature has focused on the successful case of porto alegre and has neglected to analyze how it fared elsewhere in this first rigorous comparative study of the phenomenon brian wampler draws evidence from eight municipalities in brazil to show the varying degrees of success and failure pb has experienced he identifies why some pb programs have done better than others in achieving the twin goals of ensuring governmental accountability and empowering citizenship rights for the poor residents of these cities in the quest for greater social justice and a well functioning democracy conducting extensive interviews applying a survey to 650 pb delegates doing detailed analysis of budgets and engaging in participant observation wampler finds that the three most important factors explaining the variation are the incentives for mayoral administrations to delegate authority the way civil society organizations and citizens respond to the new institutions and the particular rule structure that is used to delegate authority to citizens

thirteen scholars reexamine one of the most provocative and debated models of bureaucratic behavior as developed by william a niskanen in his seminal book bureaucracy and representative government the essays evaluate a wide array of findings both qualitative and quantitative relevant to the various aspects of the model and offer conclusions about its merits and limits suggesting alternative explanations of bureaucratic behavior niskanen provides his own reassessment and reflections on the debate

this book presents a new framework for analyzing the political economy of budget processes in latin america that is based on the following premises i the budget process must be considered as part of the overall policymaking process rather than in isolation ii budget outcomes cannot be fully explained on the basis of only one or two political or institutional dimensions iii actual practices must be considered as well as formal rules iv budget processes affect dimensions of fiscal outcomes besides fiscal sustainability particularly efficiency adaptability and representativeness v political actors and their incentives must be considered at different stages of the policymaking process and in different institutional contexts case studies are presented for eight countries in the region and a final chapter presents conclusions and suggestions for further research
