the volume explores the legacy of the general theory of action in order to exploit it for contemporary debates on the methodology of the social sciences it includes the important but so far unpublished parsons manuscript the sociology of knowledge and the history of ideas and essays by thomas fararo university of pittsburgh on the foundations of action theory victor lidz drexel university and harold bershady university of pennsylvania parsons tacit metatheory giuseppe sciortino universit  degli studi di trento toward a structural theory of social pluralism david sciulli texas a m university reformulating parsons theory for comparative research today helmut staubmann university of innsbruck the affective structure of the social world helmut staubmann is professor at the institute for sociology at the leopold franzens university innsbruck austria

in the hope of provoking discussion among sociologists psychologists philosophers and psychiatrists interested in social theory the authors have made available here a set of working papers which constitute an attempt to develop more intensively a systematic theory of action the papers include discussions of the concept of the superego the theory of symbolism and the problem of equilibrium in small groups

every complex human machine system includes a computer as a critically important means of work however an operator's interaction with a computerized system cannot be reduced to only performing computer based tasks today human computer interaction hci is not limited to trained software users people of all ages use all different kinds of gadget

universities teach courses in ethics but do they teach students how to be ethical in practice lisa kretz's ethics emotion

education and empowerment explores the ways that philosophical ethics are currently taught and argues that dominant approaches fail to adequately support ethical action in part because emotions are all too often ignored or repressed in university classrooms in isolation abstract theoretical content fails to motivate the ability to reason through an ethical dilemma does not by itself of necessity impact ethical action empowered action requires intentional emotional engagement kretz argues that part of the reason affective pedagogy fails to get sufficient uptake is due to the operations of oppression there is a long history of the reason emotion dualism undermining recognition of the necessary and valuable epistemic roles emotions play in moral life and serving as a political tactic to undermine the experience of oppressed groups this impoverishes ethical pedagogy because it is to the detriment of their ability to teach ethics in a comprehensive way and strips the potential of supporting students to enact their own reflectively held ethical beliefs and values using the example of the environmental crisis kretz makes a case for supporting students as engaged activists aware of their capacity to ethically change the world

in a world of organizations that are in constant change scholars have long sought to understand and explain how they change this book introduces research methods that are specifically designed to support the development and evaluation of organizational process theories the authors are a group of highly regarded experts who have been doing collaborative research on change and development for many years

a new comprehensive framework for programme evaluation designed to bridge the gap between the method and theory oriented perspectives is presented in this book newly available in paper chen provides an intensive discussion of the nature and functions of programme theory approaches to constructing programme theories and the integration of programme theory with evaluation processes specific types of theory driven evaluations as well as principles and

guidelines for application are developed for meeting different policy purposes application of systematic strategies is illustrated by concrete examples from a variety of evaluation studies in different fields

written by leaders in their respective fields ergonomics and psychology discusses recent advancements in psychology and addresses their applications in practice through ergonomics the book describes the basic ideas that underpin the most successfully applied approaches in ergonomics psychology training education and more it explores t

this book articulates an original scheme for the conceptualization of action beginning with a new approach to the individuation of acts it delineates the relationships between basic and non basic acts and uses these relationships in the definition of ability and intentional action the author exhibits the central role of wants and beliefs in the causation of acts and in the analysis of the concept of action professor goldman suggests answers to fundamental questions about acts and develops a set of ideas and principles that can be used in the philosophy of mind the philosophy of language ethics and other fields including the behavioral sciences originally published in 1977 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905
