this book applies concepts from ethics justice and political philosophy to five sets of contemporary energy problems cutting across time economics politics geography and technology in doing so the authors derive two key energy justice principles from modern theories of distributive justice procedural justice and cosmopolitan justice the prohibitive principle states that energy systems must be designed and constructed in such a way that they do not unduly interfere with the ability of people to acquire those basic goods to which they are justly entitled the affirmative principle states that if any of the basic goods to which people are justly entitled can only be secured by means of energy services then in that case there is also a derivative entitlement to the energy services in laying out and employing these principles the book details a long list of current energy injustices ranging from human rights abuses and energy related civil conflict to energy poverty and pervasive and growing negative externalities the book illustrates the significance of energy justice by combining the most up to date data on global energy security and climate change including case studies and examples from the electricity supply transport and heating and cooking sectors with appraisals based on centuries of thought about the meaning of justice in social decisions

law reform is a central goal of lesbian and gay campaigning groups in recent years there have been attempts to secure equal ages of consent for heterosexual and same sex sexual acts to create anti discrimination laws protecting lesbians and gays to allow lesbians and gays to serve in the military and to permit same sex marriages reformers usually try to justify such measures by invoking equality respect for privacy or related arguments this book examines the justifications for law reform which have been put forward to date it suggests that they are not in fact as strong as campaigners have assumed and that a stronger case for legal reforms can be made if the idea of empowerment is used while advancing a new argument for protecting lesbian and gay rights through law the book is skeptical about how far law is useful in eradicating discriminatory social practices

in a theory of justice and political liberalism rawls set out to prove four major propositions to justify the politics of welfarism namely that the institutions of the modern state are compatible with an idea of justice defined by fairness that political agreement on such an idea is possible that justice as fairness avoids the pitfalls of utilitarianism and its concomitant reliance on majoritarian views and that his view of justice is able to promote stability over the long run in the limits of rawlsian

justice political theorist roberto alejandro challenges these assumptions whereas other opponents of rawls have attempted to offer an alternative to his concept of justice as fairness alejandro instead examines rawls from within his own writings testing rawls s assumptions on the basis of those assumptions themselves as a result alejandro shows that rawls s idea of justice as fairness is fraught with inner tensions is exposed to utilitarian dangers and is far from being the coherent model rawls promised
