the z notation has been developed at the programming research group at the oxford university computing
 laboratory and elsewhere for over a decade it is now used by industry as part of the software and
 hardware development process in both europe and the usa it is currently undergoing bsi standardisation
 in the uk and has been proposed for iso standardisation internationally in recent years researchers
 have begun to focus increasingly on the development of techniques and tools to encourage the wider
 application of z and other formal methods and notations this volume contains papers from the seventh
 annual z user meeting held in london in december 1992 in contrast to previous years the meeting
 concentrated specifically on industrial applications of z and a high proportion of the participants
 came from an industrial background the theme is well represented by the four invited papers three of
 these discuss ways in which formal methods are being introduced and the fourth presents an
 international survey of industrial applications it also provides a reminder of the improvements which
 are needed to make these methods an accepted part of software development in addition the volume
 contains several submitted papers on the industrial use of z two of which discuss the key area of
 safety critical applications there are also a number of papers related to the recently completed zip
 project the papers cover all the main areas of the project including methods tools and the development
 of a z standard the first publicly available version of which was made available at the meeting finally
 the volume contains a select z bibliography and section on how to access information on z through comp
 specification z the international computer based usenet newsgroup z user workshop london 1992 provides
 an important overview of current research into industrial applications of z and will provide invaluable
 reading for researchers postgraduate students andalso potential industrial users of z
