taking you step by step through how to research structure and write essays this invaluable book provides all the help you need publisher s note

this volume is a timely intervention that not only helps demystify the idea of a digital dissertation for students and their advisors but will be broadly applicable to the work of librarians administrators and anyone else concerned with the future of graduate study in the humanities and digital scholarly publishing roxanne shirazi the city university of new york digital dissertations have been a part of academic research for

years now yet there are still many questions surrounding their processes are interactive dissertations significantly different from their paper based counterparts what are the effects of digital projects on doctoral education how does one choose and defend a digital dissertation this book explores the wider implications of digital scholarship across institutional geographic and disciplinary divides the volume is arranged in two sections the first written by senior scholars addresses conceptual concerns regarding the direction and assessment of digital dissertations in the broader context of doctoral education the second section consists of case studies by phd students whose research resulted in a natively digital dissertation that they have successfully defended these early career researchers have been selected to represent a range of disciplines and institutions despite the profound effect of incorporated digital tools on dissertations the literature concerning them is limited this volume aims to provide a fresh up to date view on the digital dissertation considering the newest technological advances it is especially relevant in the european context where digital dissertations mostly in arts based research are more popular shaping the digital dissertation aims to provide insights precedents and best practices to graduate students doctoral advisors institutional agents and dissertation committees as digital dissertations have a potential impact on the state of research as a whole this edited collection will be a useful resource for the wider academic community and anyone interested in the future of doctoral studies

writing built environment dissertations and projects will help you to write a good dissertation or project by giving you a good understanding of what should be included and showing you how to use data collection and analysis tools in the course of your research addresses prominent weaknesses in under graduate dissertations including weak data collection superficial analysis and poor reliability and validity includes many more in depth examples making it easy to understand and assimilate the concepts presented issues around study skills and ethics are embedded throughout the book and the many examples encourage you to consider the concepts of reliability and validity second edition includes a new chapter on laboratory based research projects supporting website with sample statistical calculations and additional examples from a wider range of built environment subjects

this collection of essays from world renowned scholar hans walter gabler contains writings from a decade and a half of retirement spent exploring textual criticism genetic criticism and literary criticism in these sixteen stimulating contributions he develops theories of textual criticism and editing that are inflected by our advance into the digital era structurally analyses arts of composition in literature and music and traces the cultural implications discernible in book design and in the canonisation of works of literature and their authors distinctive and ambitious these essays move beyond the concerns of the community of critics and scholars gabler responds innovatively to the issues involved and often endeavours to re think their urgencies by bringing together the orthodox tenets of different schools of textual criticism he moves between a variety of topics ranging from fresh genetic approaches to the work of james joyce and virginia woolf to significant contributions to the theorisation of scholarly editing in the digital age written in gabler s fluent style these rich and elegant compositions are

essential reading for literary and textual critics scholarly editors readers of james joyce new modernism specialists and all those interested in textual scholarship and digital editing under the umbrella of digital humanities

library technology reports vol 47 no 8 according to recent studies e book penetration in libraries of all types is rising rapidly creating or expanding an e book collection is a complicated challenge in addition to facing the same challenges a librarian would face in developing a print collection librarians developing an e book collection also face a host of unprecedented legal technological and vendor challenges this issue of library technology reports will examine these challenges focusing on strategies for purchasing e books in a consortium working with vendors implementing e reader programs in an academic environment and purchasing electronic textbooks although the challenges are significant this issue will show how they can be overcome and how the effort it takes to develop an e book collection is well worth the effort

the science of informatics in the broadest sense has been several thousands of years in the making with the recent emergence of large storage devices and high speed processing of data it has become possible to organize vast amounts of data as digital products with ontologic tags and concepts for smart queries coupling this computational capability with earth science data defines the emerging field of geoinformatics since the science of geology was established several centuries ago observations led to conclusions that were integrative in concept and clearly had profound implications for the birth of geology as disciplinary information about earth becomes more voluminous the use of geoinformatics will lead to integrative science based discoveries of new knowledge about planetary systems twenty one research papers co authored by 96 researchers from both earth and computer sciences provide the first ever organized presentation of the science of informatics as it relates to geology readers will readily recognize the vast intellectual content represented by these papers as they seek to address the core research goals of geoinformatics publisher s website

according to the council of graduate schools only 57 percent of students who start their ph d s complete them within 10 years and many times it s the thesis or dissertation that is holding them back but if you re equipped with how to write an exceptional thesis or dissertation you won t waste precious time deliberating how to organize and execute a persuasive thorough thesis or dissertation for both master s and doctorate levels even if you have never written a paper that spanned more than five pages or spoken in front of a committee you will learn how to easily formulate and utilize the correct research methodology organization citation styles formatting options submission guidelines and presentation pointers to ensure that the academic world will notice and respect your hard work with this book you will learn everything from the ground level basics to the more detailed breakdown of the research process you will gain a strong understanding of the difference between a thesis and dissertation and you will grasp the components expected of your work regardless of the subject matter of your research this book will walk you through the entire process step by step teaching you how to structure a planning and writing schedule that
