a distinguished and experienced appellate court judge Richard A. Posner offers in this new book a unique and to orthodox legal thinkers a startling perspective on how judges and justices decide cases when conventional legal materials enable judges to ascertain the true

facts of a case and apply clear pre existing legal rules to them posner argues they do so straightforwardly that is the domain of legalist reasoning however in non routine cases the conventional materials run out and judges are on their own navigating uncharted seas with equipment consisting of experience emotions and often unconscious beliefs in doing so they take on a legislative role though one that is confined by internal and external constraints such as professional ethics opinions of respected colleagues and limitations imposed by other branches of government on freewheeling judicial discretion occasional legislators judges are motivated by political considerations in a broad and sometimes a narrow sense of that term in that open area most american judges are legal pragmatists legal pragmatism is forward looking and policy based it focuses on the consequences of a decision in both the short and the long term rather than on its antecedent logic legal pragmatism so understood is really just a form of ordinary practical reasoning rather than some special kind of legal reasoning supreme court justices are uniquely free from the constraints on ordinary judges and uniquely tempted to engage in legislative forms of adjudication more than any other court the supreme court is best understood as a political court

judicial decision making may ideally be impartial but in reality it is influenced by many different factors including institutional context ideological commitment fellow justices on a panel and personal preference empirical literature in this area increasingly analyzes this complex collection of factors in isolation when a larger sample size of comparative institutional contexts can help assess the impact of the procedures norms and rules on key institutional decisions such as how appeals are decided four basic institutional questions from a comparative perspective help address these studies regardless of institutional context or government framework who decides or how is a justice appointed how does an appeal reach the court what processes occur who is before the court or how do the characteristics of the litigants and third parties affect judicial decision making how does the court decide the appeal or what institutional norms and strategic behaviors do the judges perform to obtain their preferred outcome this book explains how the answers to these institutional questions largely determine the influence of political preferences of individual

judges and the degree of cooperation among judges at a given point in time the authors apply these four fundamental institutional questions to empirical work on the supreme courts of the us uk canada india and the high court of australia the ultimate purpose of this book is to promote a deeper understanding of how institutional differences affect judicial decision making using empirical studies of supreme courts in countries with similar basic structures but with sufficient differences to enable meaningful comparison
