the book cenozoic geology of the central andes of argentina prepared within the context of instituto del cenozoico at universidad nacional de salta is thus a compendium of 27 original contributions containing extensive work on the multiple aspects of andean geology of the past 65 million years each study has been responsibly peer reviewed thoroughly edited and carefully presented

the present volume stratabound ore deposits in the andes has its roots in an international seminar on stratabound ore deposits which took place in september 1986 in cusco peru sponsored by multi ciencias peru and unesco during this seminar it became clear that the amount and quality of research done on stratabound ore deposits in the andes required a synthesis researchers in industry and government as well as in academia including many which had participated at the cusco seminar were invited to contribute the answer was extremely positive confirming the idea that a book expressing the state of the art of the study of stratabound ore deposits in the andes was long overdue as editors we sought to give maximum coverage to the present knowledge yet keeping the

length and thereby the price within reasonable limits the book contains three types of contributions in the first part the reader will find review papers focusing on 1 the geologic framework 2 the metallogenesis in andean countries including also types of deposits differing from those of stratabound nature cardozo and cedillo oyarzun and 3 an introductory overview of the stratabound ore deposits in the andes emphasizing their geotectonic position as a classification tool
