there are some unanswered questions in modern physics that modern physics does not have answers for that it is due to the inability of theories some physicists believe that by combining general relativity and quantum mechanics these problems may be resolved and the unanswered questions will be answered in all of these efforts the classical physic has been ignored while nature is unique and all physical phenomena from the microscopic or the macroscopic ones are obeying the same law therefore to solve the contemporary physics problems in this book from a new approach the basic concepts and relations of modern physics are reviewed and analyzed then three contemporary theories which combine constructs from several different theoretical perspectives are described to show how classical mechanics relativity and quantum mechanics can be combined coherently

this textbook is very interesting and funny with the monkey based problems and the images displayed in these problem sets many students admitted to laughing out loud while reading them this book also provides helpful practice for anyone who loves learning physic it is a collection of creative physics problems no examples or solutions are provided as this volume of physics problems is intended to be used in conjunction with a textbook
