this book focuses on the gradual reform of chinese society since china s opening up to the world and gives a unified explanation of the process based on bargaining theory it studies institutional changes as a non violent bargaining process in which different parties constantly make adjustments to social contracts by following the tradition of classical economics initiated by adam smith the book has two major conclusions first bargaining driven institutional reform ensures both efficiency and equality second bargaining driven institutional reform involves the principles of and is an essential approach to democracy the book s interpretation of the economic phenomena and the reform mechanism in china not only reflects china s 30 year

reform experience but also pays due homage to the academic heritage in the related areas yet as a departure from traditional theories of the chinese reform this book lays out a unified and legitimate theoretical framework in order to clarify the international misinterpretations of china s social change and institutional reform

the principal purpose of topics in musicology has been to identify meaning bearing units within a musical composition that would have been understood by contemporary audiences and therefore also by later receivers albeit in a different context and with a need for historically aware listening since leonard ratner 1980 introduced the idea of topics his relatively simple ideas have been expanded and developed by a number of distinguished authors topic theory has now become a well established branch of musicology often embracing semiotics but its relationship to performance has received less attention musical topics and musical performance thus focuses on the interface of theory and practice and investigates how an appreciation of topical presence in a work may prompt interpretative thoughts for a potential performer as well as how performers have responded to such a presence in practice the chapters focus on music from the nineteenth twentieth and twenty first centuries with case studies drawn from composers as diverse as beethoven scriabin and péter eötvös using both scores and recordings the book presents a variety of original and innovative perspectives on the subject from a range of distinguished authors and addresses a neglected area of musicology and musical performance
