reading and textual interpretation are ordinary human activities performed inside as well as outside academia but precisely how they function as unique sources of knowledge is not well understood in this book rené van woudenberg explores the nature of reading and how it is distinct from perception and attending to testimony which are two widely acknowledged knowledge sources after distinguishing seven accounts of interpretation van woudenberg discusses the question of whether all reading inevitably involves interpretation and shows that although reading and interpretation often go together they are distinct activities he goes on to argue that both reading and interpretation can be paths to realistically conceived truth and explains the conditions under which we are justified in believing that they do indeed lead us to the truth along the way he offers clear and novel analyses of reading meaning interpretation and interpretative knowledge

5 dimensional quantum physics model that builds up the entire universe only on energetic oscillating fields and a very special universal substance this substance is actually the difference between whether something can be seen discovered detected or not this universal substance was fully proven by carl david anderson as early as the 1930s this semi physical substance is produced only by the higg s field that s the only reason they were able to discover this higg s field as the absolute only possible field they could detect in the particle accelerator they found absolutely no physical particles remember this this is very important if you want to understand the universe as it really appears this new quantum physical hologram model s atoms are only these 4 dimensional oscillating energetic fields which are actually fully proven by the particle accelerator in 2016 as a result 99 of the universe actually consists of an undetectable quantum physics side and 1 is this strange substance this is where reality comes to the surface and becomes fully visible in the highly active 5 dimensional quantum physical universal engine room the fact that something is visible and detectable is only due to the substance this new model reveals tesla technology and stealth technology and points out the very reason why the ufo s can disappear from today s high tech radars the reason why the ufo can disappear from radar is that there are no physical particles left in the ufo only the atom this substance can disappear again completely controlled also the stealth effect occurs in the ufo the particle accelerator s final and very clear evidence just says that there can be no physical particles and that it actually proves that there has never been a big bang still today is this fake big bang universe only researched and taught why is it only because scientists don t understand the right universe that the particle accelerator actually proved to them should be there the energetic oscillating field universe
