this book examines the views of greek church fathers on hoarding saving and management of economic surplus and their development primarily in urban centres of the eastern mediterranean from the late first to the fifth century the study shows how the approaches of greek fathers such as clement of alexandria basil of caesarea john chrysostom isidore of pelusium and theodoret of cyrrhus to hoarding and saving intertwined with stances toward the moral and social obligations of the wealthy it also demonstrates how these fathers

responded to conditions and practices in urban economic environments characterized by sharp inequalities their attitudes reflect the gradual widening of christian congregations but also the consequences of the socio economic evolution of the late antique eastern roman empire among the issues discussed in the book are the justification of wealth alternatives to hoarding and the reception of patristic views by contemporaries

the hunns are part of europe's rich history the direct hunnic impact on europe as it stood around 370 was massive attila is one of the few names from antiquity that is still instantly recognised three famous experts on the hunns otto maenchen helfen 1973 edward thompson 1948 1996 and mischa meier 2020 contributed significantly to our knowledge but they failed to answer the five most important questions on attila and the hunns which was the native country of the hunns where are the capitals and tombs of attila's royal ancestors uldin charaton and ruga where did attila's decisive battle of the catalaunian plains really take place where is attila's lost capital where is attila's legendary tomb with his fabled sword of mars this book provides answers to each of these five questions while also solving other mysteries the identity of the enigmatic river drecon the name of the village of attila's sister in law and the true course of attila's gallic campaign in 451 and his italian campaign in 452

why do we act as we do why do we assume that the way of being and behaving in our community is right good and common sense why do we fail to understand those who act and feel differently these are some of the questions that this book raises and attempts to answer this ontology is rooted in the phenomenological tradition but with the innovation of taking the form of life as the central ontological unit we are our form of life but as a transcendental immanent reality this is not directly equivalent to culture or society it is rather the political realisation in the world of an image of the human being shared by a given community this overcomes the traditional dualities of individual and society consciousness and body facticity and freedom actuality and possibility the subject is a subject because it identifies with that image which is equivalent to the intersubjective consciousness of how one should act and be in the world

this gives rise to multiple forms of life the latter implies a certain power to be who one wants to be in this way the book is an invitation to self examination for if our form of life is voluntary i e capitalism it shatters the illusion that one cannot live in any other way and places us before the anguished but inevitable task of justifying its adoption or resorting to its abandonment the book offers a dynamic analysis of human existence as the actualisation of a form of life that is at the same time the exercise of a certain power over those who seek to live otherwise especially when that form is institutionalised by a government as the essence of the national or transnational community

presents the first comprehensive study of the byzantine google and how it reshaped byzantine court culture in the tenth century
