you are about to embark on a journey in some respects it will be similar to ones taken by other pioneers and innovators in the past your journey may begin with excitement and trepidation as you continue and persevere you will discover new things and most importantly will feel a sense of accomplishment and self improvement there will be times along the journey when you believe that you cannot possibly go any further you will push yourself and lo and behold you will realize that you have discovered and learned so much more than you imagined you will be changed forever 13 change is taking place everywhere and will proceed whether we are for or against it just as the acoustic telegraph telephone replaced the electric telegraph the incandescent lamp replaced gas lighting wireless methods superseded wired technologies the turbines eventual replacement of the horse the aircraft the train the email the mailed letter to name just a few changes in our recent history in all cases these changes were not overnight phenomena but ones that took time slowly the practitioners changed the users switched and the infrastructure transitioned and then the process repeated itself this is civilization advancing beginning with a technological innovation then a marketing of the technology to define its benefits and most importantly the subsequent preparation of society for its eventual deployment the only certainty is uncertainty our position on the merits of the change must be based on our knowledge and not hearsay 13 as you embark on this journey of enlightenment you may encounter resistance from others as with all innovation and transitional periods naysayers especially and perhaps surprisingly from within the field will state why the new approach is inadequate insufficient incapable not going to work and so forth in business this denial to consider the need for possible change is called core rigidity why the term core rigidity rigidity because individuals refuse to consider any change or revision and want the status quo to remain core because most of these individuals are experts in the field and have years of experience in the existing environment their specific knowledge is based on the current processes and most importantly if the change does come to pass their skill sets will be negated hence the term core rigidity 13 some say it is human nature to discount new methodology new theories new approaches new ideas to paraphrase a common quote if it's not broken don't fix it i say where would we be today if all of our ancestors had thought that way despite the reluctance of incumbents change is continuous 13 with respect to virtual communications we are approaching the societal stage which is why i have written this book virtual communications will eventually replace the current mode of distance contact communicating and meetings will be forever changed it is my intention to provide the information and knowledge to empower you to successfully join this new and exciting way of communicating i will show you how to employ and understand tools used in communicating virtually such as adobe presenter adobe captivate and adobe connect 13 in this book i have introduced a number of new concepts that are useful in the preparation and implementation of the virtual environments and digital content 13 let's begin our
