the expert guide to biodynamic farming and gardening in this revised and updated edition of grasp the nettle peter proctor tells the reader how to apply biodynamic methods of farming and gardening to a wide range of conditions in new zealand and in other countries the book provides practical observations and techniques and relates these to the spiritual scientific knowlege upon which that biodynamic practice is based peter gives tips on how to recognise healthy soil and pasture and on how to make your own biodynamic preparations he also gives examples of farms that are successfully using biodynamic methods this book aims to assist biodynamic farmers and gardeners to observe the processes of life and growth and to understand how these processes are governed by cosmic forces so they can use this knowlege in applying their practical skills peter proctor past national field advisor for the nz bio dynamic farming and gardening association now teaches and advises farmers on biodynamic methods around the world

excerpt from farm and garden rule book a manual of ready rules and reference with recipes precepts formulas and tabular information for the use of general farmers gardeners fruit growers stockmen dairymen poultry men foresters rural teachers and others in the united states and canad the first edition of this manual was published late in 1889 and the second early in 1892 both by the rural publishing company publisher of the american garden and rural new yorker the third edition much remodeled was published by the macmillan co may 1895 the book has been reprinted february 1896 may 1897 august 1898 august 1899 june 1901 october november 1902 february 1904 july 1905 january 1907 may june 1908 august 1909 the old form of the book under the title the horticulturist s rule book is now to be discontinued having served its place and day so far as i know it was the first compilation of its kind in this country and therefore it was very imperfect and incomplete the intervening years covering nearly a quarter century have also seen a vast enlargement of the farmer s horizon so that the little book that i prepared in my novice days can no longer represent the situation i am sure that i have more misgiving in putting out this larger and completer book than i had in the small first effort the field is wider and therefore more difficult to cover and knowledge has grown so uninterruptedly that one knows scarcely where to begin and what to compass the only definite point is where to end for publishers fortunately set limits to sizes of books and when this limit was reached i discarded three or four chapters and prepared the index for myself i am conscious of the many good things that have not been printed in the book but i hope that my consultant i cannot expect to have a reader for a book of this sort will find some satisfaction in the things that are included about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

this book gives a comprehensive review of all published evidence relevant to lunar gardening i e how cycles of the moon affect agriculture it evaluates traditions stretching over two and a half thousand years relating them to modern field trials and laboratory tests it argues that the subject is one of real practical benefit to organic

farmers and gardeners the author has published england s moon gardening calendar for several decades and has worked on several bio dynamic farms
