packed with previously unpublished photographs this book celebrates the variety of container traffic on Britain's railways

documenting the wide variety of traffic on the busy section of the Eastleigh and Southampton railways

when british railways br was privatised in april 1994 some of the freight companies were bought by english welsh scottish railways ewsr which immediately reviewed the mixed locomotive fleet and led to the decision to purchase 250 locomotives from general motors usa based on that company s earlier class 59 design supplied to foster yeoman in 1985 delivered to newport docks each locomotive was lubricated filled with fuel and water and released to traffic within hours of being craned onto the quayside the early privatised freight market was geared to the heavy industries but the changes of government policies to counteract global warming has seen consequent changes in freight operations whilst global trading has seen massive growth in the movement of containers between ports and inland distribution centres this changing market has encouraged both existing and new operators to base operations on a reliable locomotive fleet which has been met by the class 66 design the expansion of the locomotive s operating area has been recorded within the book through a regional analysis noting both the freight services operated within the region and the companies providing them this also notes changes of operators both by exchange of locomotives and exchange of hauler as contracts are re negotiated at regular intervals fred kerr s book seeks to show as at october 2019 the range of services that have been operated by class members including the occasional passenger services despite the locomotives not being fitted with any heat generating equipment

over the past forty years state provincial and local governments in the united states and canada have provided foreign automakers with approximately 4 80 billion in incentives in order to lure light vehicles assembly plants to their areas this has included tax abatements infrastructure construction land giveaways job training programs and other subsidies as of early 2015 ten foreign vehicle makers operated 20 light vehicles in developed north america despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into the united states and canada before launching vehicle plants in developed north america each has followed its own specific historical development path and has created its own unique growth trajectory this book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the united states and or canada through early 2015 in addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the united states and canada this includes the first foreign automaker to build its cars in the united states de dion bouton of france in july 1900 the early 20th century endeavors of fiat mercedes and rolls royce and the present day hopes of

chinese and indian automakers in the process the text also provides an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the united states and canada and to help them take a more holistic look at the pros and cons of attracting automobile manufacturing fdi it is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in north america and worldwide

promises of indemnity are found in many kinds of commercial contracts not just contracts of insurance this book examines the nature and effect of contractual indemnities outside the insurance context it is the first work to provide a detailed account of the subject in english law the book presents a coherent theory of the promise of indemnity while also addressing important practical issues such as the construction of contractual indemnities the subject is approached from two perspectives the foundations are laid by examining general principles applicable to indemnities in various forms this covers the nature of indemnity promises general principles of construction the determination of scope and the enforcement of indemnities the approach then moves from the general to the specific by examining separately particular forms of indemnity included among these are indemnities against liability to third parties and indemnities against default or non performance by third parties the book states english law but it draws upon a considerable amount of material from other common law jurisdictions including australia canada new zealand and singapore it will appeal to readers from those countries
