John Santrock's educational psychology emphasizes the application of theory to real classroom practice with richly evocative classroom vignettes from practicing teachers and a wealth of case studies. Educational psychology helps students think critically about the research basis for best practices. Santrock's hallmark learning system organizes the content into manageable chunks under learning goals supporting retention and mastery so that students will have an engaging and successful course experience.

The prime method of inquiry in science is the experiment. The key features are control over variables, careful measurement, and establishing cause and effect relationships. An experiment is an investigation in which a hypothesis is scientifically tested. In an experiment, an independent variable (the cause) is manipulated and the dependent variable (the effect) is measured. Any extraneous variables are controlled. An advantage is that

experiments should be objective the views and opinions of the researcher should not affect the results of a study this is good as it makes the data more valid and less bias
