working at the forefront of cosmetic surgery at the turn of the twentieth century dr suzanne Noël was both a pioneer in her medical field and a firm believer in the advancement of women today her views on the benefits of

aesthetic surgery to women may seem at odds with her feminist principles but by placing noël in the context of turn of the century french culture this book is able to demonstrate how these two worldviews were reconciled noël was able to combine her intense convictions for gender equality and anti ageism in the workforce with her underlying compassion and concern for her female patients during a time when there were no laws in place to protect women from workplace discrimination she was also responsible for several advances in cosmetic surgery a thriving industry and is today best known for her development of the mini facelift this book therefore sheds much valuable light on advances in aesthetic surgery twentieth century beauty culture women and the public sphere and the new woman

theological discipline seeking to reverse this trend chrysostomos stamoulis brings into conversation a plethora of voices from church fathers to contemporary poets and from a marxist political theorist to a literary critic out of this dialogue stamoulis builds a model for the re appropriation of orthodoxys patristic and byzantine past that is no longer defined in antithesis to the western present the openness he proposes allows us to perceive afresh the world shot through with divinity if only we can lift our gaze to see it dismantling the false dichotomy philokalia or aesthetics is the first step
