This is a true science fiction story as opposed to most novelettes which are in fact science fantasy. The story occurs two hundred years from now, a time at which space cruisers of the World Federation Space Force pursue an Islamic terrorist battle cruiser to the planet Saturn. Saturn is of vital importance because that is where most of the world's supply of the element Helium-3 is mined. At this time Helium-3 is the major fuel for the world's fusion engines. Fusion supplies the energy that powers the world's advanced technological civilization. Without this critical energy source, the world's economy would totally collapse. The plot centers around one of the cruisers, the Ranger, and its captain, Roger Nelson. The story includes a long chase through the outer solar system with a diversion to the planet Mars. Mars is envisioned not as it is now but in the process of being terraformed and becoming a new habitat for permanent large-scale colonization. The Ranger has many adventures including a final climatic battle with the enemy battle cruiser among the rings of Saturn. The plot centers around advanced and realistic technology but also includes a minor romance. The basic theme of the story is simply that mankind's perpetual struggle between good and evil will continue even in outer space.
