medieval architecture comprises much more than the traditional image of gothic cathedrals and the castles of chivalry a great variety of buildings synagogues halls and barns testify to the diverse communities and interests in western europe in the centuries between 1150 and 1550 this book looks at their architecture from an entirely fresh perspective shifting the emphasis away from such areas as france towards the creativity of other regions including central europe and spain treating the subject thematically coldstream seeks out what all buildings both religious and secular have in common and how they reflect the material and spiritual concerns of the people who built and used them furthermore the author considers how and why after four centuries of shaping the landscapes and urban patterns of europe medieval styles were superseded by classicism

ranging from gotland to apulia roger stalley explores the richness and variety of european architecture in terms of the social and religious aspirations of the time with an emphasis on the symbolic significance these buildings expressed written with style and humour the lively text includes many quotations from ancient sources providing fascinating insight into the way that medieval buildings were created and enlivening our knowledge of this period

this volume offers unparalleled coverage of all aspects of art and architecture from medieval western europe from the 6th century to the early 16th century drawing upon the expansive scholarship in the celebrated grove dictionary of art and adding hundreds of new entries it offers students researchers and the general public a reliable up to date and convenient resource covering this field of major importance in the development of western history and international art and architecture

this dictionary provides a historical overview of the major architectural developments and styles building materials and types major structures and locations sites and architects historical eras like ancient egyptian architecture and the renaissance in europe and movements such as art deco are covered materials discussed range from concrete stone glass and wood while types of structures include architectural inventions such as the arch and dome to building types from monasteries and mosques to museums and skyscrapers major structures highlighted in this volume include not only great achievements such as hagia sophia and the eiffel tower but also important sites such as the great zimbabwe and angkor wat found on the unesco world heritage site list general geographical areas are also covered such as african and russian architecture noted architects include theorists from the ancient chinese engineer yu hao roman engineer vitruvius to many current architects such as zaha hadid and santiago calatrava with a focus on architects who have enjoyed lasting fame through history or have won international prizes such as the pritzker architecture prize this second edition of historical dictionary of architecture contains a chronology an introduction and an extensive bibliography the dictionary section has over 400 cross referenced entries on architects famous structures types of materials and the different architectural styles this book is an excellent access point for students researchers and anyone wanting to know more about architecture

architecture which can be understood in its most basic sense as a form of enclosure created with an aesthetic intent first made its appearance in the prehistoric age from its earliest developments architecture changed over time and in different cultures in response to changing cultural needs aesthetic interests materials and techniques the a to z of architecture provides information on architects like frank lloyd wright tadao ando leon battista alberti filippo brunelleschi michelangelo and konstantin stepanovich melnikov as well as on famous structures like the acropolis the colosseum the forbidden city machu picchu notre dame the pyramids of

giza stonehenge and the world trade center the dictionary examines the development of architecture over the centuries through a chronology an introductory essay a bibliography and hundreds of cross referenced dictionary entries on the major architects well known buildings time periods styles building types and materials in world architecture

a unique guide to all aspects of life in the middle ages

aside from hagia sophia the monuments of the byzantine east are poorly understood today this is in sharp contrast to the well known architectural marvels of western europe's middle ages in this landmark survey distinguished art historian robert ousterhout introduces readers to the rich and diverse architectural traditions of the medieval eastern mediterranean the focus of the book is the byzantine or east roman empire 324 1453 ce with its capital in constantinople although the framework expands chronologically to include the foundations of christian architecture in late antiquity and the legacy of byzantine culture after the fall of constantinople in 1453 geographically broad as well this study includes architectural developments in areas of italy the caucasus the near east the balkans and russia as well as related developments in early islamic architecture alternating chapters that address chronological or regionally based developments with thematic studies that focus on the larger cultural concerns the book presents the architectural developments in a way that makes them accessible interesting and intellectually stimulating in doing so it also explains why medieval architecture in the east followed such a different trajectory from that of the west lavishly illustrated with hundreds of color photographs maps and line drawings eastern medieval architecture will establish byzantine traditions to be as significant and admirable as those more familiar examples in western europe and serve as an invaluable resource for anyone interested in architectural history byzantium and the middle ages

ideal for high school and college students studying history through the everyday lives of men and women this book offers intriguing information about the jobs that people have held from ancient times to the 21st century this unique book provides detailed studies of more than 300 occupations as they were practiced in 21 historical time periods ranging from prehistory to the present day each profession is examined in a compelling essay that is specifically written to inform readers about career choices in different times and cultures and is accompanied by a bibliography of additional sources of information sidebars that relate historical issues to present day concerns as well as related historical documents readers of this work will learn what each profession entailed or entails on a daily basis how one gained entry to the vocation training methods and typical compensation levels for the job the book provides sufficient specific detail to convey a comprehensive understanding of the experiences benefits and downsides of a given profession selected accompanying documents further bring history to life by offering honest testimonies from people who actually worked in these occupations or interacted with those in that field

the renaissance was a diverse phenomenon marked by innovation and economic expansion the rise of powerful rulers religious reforms and social change encompassing the entire continent renaissance architecture examines the rich variety of buildings that emerged during these seminal centuries of european history although marked by the rise of powerful individuals both patrons and architects the renaissance was equally a time of growing group identities and communities and architecture provided the public face to these new identities religious reforms in northern europe spurred on by martin luther rejected traditional church function and decoration and proposed new models political ambitions required new buildings to satisfy court rituals territory nature and art intersected to shape new landscapes and building types classicism came to be the international language of an educated architect and an ambitious patron drawing on the legacy of ancient rome yet the richness of the medieval tradition continued to be used throughout europe often

alongside classical buildings examining each of these areas by turn this book offers a broad cultural history of the period as well as a completely new approach to the history of renaissance architecture the work of well known architects such as michelangelo and andrea palladio is examined alongside lesser known though no less innovative designers such as juan guas in portugal and benedikt ried in prague and eastern europe drawing on the latest research it also covers more recent areas of interest such as the story of women as patrons and the emotional effect of renaissance buildings as well as the impact of architectural publications and travel on the emerging new architectural culture across europe as such it provides a compelling introduction to the subject for all those interested in the history of architecture society and culture in the renaissance and european culture in general

this is the first book devoted to churches in ireland dating from the arrival of christianity in the fifth century to the early stages of the romanesque around 1100 including those built to house treasures of the golden age of irish art such as the book of kells and the ardagh chalice carrag in s comprehensive survey of the surviving examples forms the basis for a far reaching analysis of why these buildings looked as they did and what they meant in the context of early irish society carrag in also identifies a clear political and ideological context for the first romanesque churches in ireland and shows that to a considerable extent the irish romanesque represents the perpetuation of a long established architectural tradition

comprehensive overview of architecture as an evolving continuum packed with images of the greatest triumphs of western architecture replaces isbn 0 8230 2273 0 this highly acclaimed reference work traces the history of western architecture from its earliest days in mesopotamia and egypt to the dramatic impact of computer aided design at the beginning of this century looking at architectural history as a living continuum rather than a museum of neatly labeled styles the author emphasizes the vitality of the classical language of architecture twenty pages of text and twenty five new pictures have been added to bring this new edition of

an authoritative classic completely up to date

in this original account of architecture in england between c 1150 and c 1250 peter draper explores how the assimilation of new ideas from france led to an english version of gothic architecture that was quite distinct from gothic expression elsewhere the author considers the great cathedrals of england canterbury wells salisbury lincoln ely york durham and others as well as parish churches and secular buildings to examine the complex interrelations between architecture and its social and political functions architecture was an expression of identity draper finds and the unique gothic that developed in england was one of a number of manifestations of an emerging sense of national identity the book inquires into such topics as the role of patrons the relationships between patrons and architects and the wide variety of factors that contributed to the process of creating a building with 250 illustrations including more than 50 in color this book offers new ways of seeing and thinking about some of england s greatest and best loved architecture published for the paul mellon centre for studies in british art
