that the child is learning from the whole experience not just that part of the experience to which the adult gives attention although early childhood education does not have to occur in the absence of the parent or primary caregiver this term is sometimes used to denote education by someone other than these the parent or primary caregiver both research in the field and early childhood educators view the parents as an integral part of the early childhood education process early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent other terms that is often used interchangeably with early childhood education are early childhood learning early care and early education much of the first two years of life are spent in the creation of a child s first sense of self or the building of a first identity because this is a crucial part of children s makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy if care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience
