It's never too early to start achieving your goals. Get started on the road to success with this unique guide to middle school and beyond brought to you by FranklinCovey, the company behind the 7 Habits series and the leader in middle school. It's full of changes, maybe it's a new bigger school, maybe it's friendships starting to get more complicated, or maybe it's a combination of a lot of things, but these changes don't have to be bad. In fact, they could be the best thing for us because when things start to change, we have the opportunity to grow. That's why even though middle schoolers have a ton of other things going on, middle school is the perfect time for them to start altering their habits and goals for their future success. Sure, it might sound a little scary, but with a little help, it can also be exciting. Framed as twelve conversations to start having rather than checklists or rules, this unique guide helps students start thinking about what they want their futures to look like and readying themselves to achieve those goals. In the *Middle School Student's Guide to Academic Success*, portions of which were previously published as *Beat the Middle*, authors Blake and Bo Nemelka offer tried and true advice, opportunities for reflection and action that middle schoolers can tailor to their individual goals and interests, and ways for parents and guardians to help them along the way. Beginning with topics students can get started on now, like setting goals, improving your GPA, working on time management skills, and balancing extracurricular activities, and moving forward to future subjects including college applications, scholarships, and money management, this book is the ultimate guide to helping readers become not only successful middle schoolers but successful people.

A comprehensive introduction to middle school teaching, this textbook focuses explicitly on instructional strategies that encourage adolescents to become active participants in their own learning within a world of accountability and standardized testing. The author, an experienced middle school teacher and teacher educator, takes a constructivist approach to teaching that considers the whole child, including the emotional, psychological, social, and cultural variables uniquely associated with adolescence. The text examines the full range of middle school topics, from the development and diversity of middle school learners to the structures, curriculum, and management of the classroom itself. Special features include empowering middle school students to take ownership of their learning, teaching scenario key points, and creating an anti-oppressive atmosphere in your classroom. Textboxes help teachers gain a clearer understanding of content presented and encourage them to become reflective practitioners. Callouts throughout explicitly link chapter content to NMSA standards. Discussion of the unique challenges of actively engaging bilingual students, special needs students, and students exhibiting antisocial behavior. Accounts about middle school students illustrate the ways adolescents think about

school and learning a chapter that focuses on ways teachers can apply the general teaching strategies to specific subject areas sample lesson plans focus questions chapter summaries journal entries and student activities assignments are included throughout to encourage readers to actively participate with the text
