nowadays the model ship builder always starts with a modular model the renowned manufacturers offer numerous options for a relatively inexpensive and simple start at some point they go on a test drive to model waters and to meetings of model building clubs and there they see their painstakingly built model lined up in multiples the model builder decides to choose one that is a little rarer for the next model there is a solution to this problem because construction kits can be strongly individualised with sometimes very little means from the content the construction kit selection the conversion and customisation of various kit models from billing boats deans marine graupner krick model slipway robbe sievers modellbau marine models for individualisation conversion ideas for naval units modify and improve models of the dgzrs extreme conversions on a modular basis create unique models with little effort

perturbative algebraic quantum field theory paqft the subject of this book is a complete and mathematically rigorous treatment of perturbative quantum field theory pqft that doesn't require the use of divergent quantities and works on a large class of lorentzian manifolds we discuss in detail the examples of scalar fields gauge theories and the effective quantum gravity pqft models describe a wide range of physical phenomena and have remarkable agreement with experimental results despite this success the theory suffers from many conceptual problems paqft is a good candidate to solve many if not all of these conceptual problems chapters 1-3 provide some background in mathematics and physics chapter 4

concerns classical theory of the scalar field which is subsequently quantized in chapters 5 and 6 chapter 7 covers gauge theory and chapter 8 discusses effective quantum gravity the book aims to be accessible to researchers and graduate students who are interested in the mathematical foundations of pqft
