building on the work of rhetoricians philosophers linguists and theorists in other disciplines karen burke lefevre challenges a widely held view of rhetorical invention as

the act of an atomistic individual she proposes that invention be viewed as a social act in which individuals interact dialectically with society and culture in distinctive ways

this title explores key sociological theories and their application in solving real world social issues such as poverty inequality and public policy a practical resource for sociology students

managing innovation the social dimensions of creativity invention and technology focuses on the relationship between inventions and innovations with industrial development and economic advancement the book stresses the point that advancement in industries and economy can be more successful when these are in balance containing the works of various authors the book proceeds by highlighting the social dimension of invention and innovation the role of the government in the promotion of innovations and inventions is also noted the book also reiterates the point that human factors have definitely affected innovation and productivity this stance is supported by the discussion on a case study in labor management cooperation inventions and innovations in the social dimension are also established to be related with industrial productivity the book also touches upon how education has influenced the advancement of technology in japan the text is best suited to those who are interested in pushing the role of inventions and innovations in shaping the society

two problems continually arise in the sciences and humanities according to mario bunge parts and wholes and the origin of novelty in emergence and convergence he works to address these problems as well as that of systems and their emergent properties as exemplified by the synthesis of molecules the creation of ideas and social inventions along the way bunge examines further topical problems such as the search for the mechanisms underlying observable facts the limitations of both individualism and holism the reach of reduction the abuses of darwinism the rational choice hermeneutics feud the modularity of the brain vs the unity of the mind the cluster of concepts around maybe the uselessness of many worlds metaphysics and semantics the hazards posed by bayesianism the nature of partial truth the obstacles to correct medical diagnosis and the formal conditions for the emergence of a cross discipline bunge is not interested in idle fantasies but about many of the problems that occur in any discipline that studies reality or ways to control it his work is about the merger of initially independent lines of inquiry such as developmental evolutionary biology cognitive neuroscience and socio economics bunge proposes a clear definition of the concept of emergence to replace that of supervenience and clarifies the notions of system real possibility inverse problem interdiscipline and partial truth that occur in all fields

pitirim a sorokin 1889 1968 was one of the most original important and controversial figures in american sociology his spectacular rise from a peasant childhood in czarist russia to the olympian heights of harvard university provides an

unlikely and fascinating lens for examining the history of an entire discipline and as barry johnston shows his equally dramatic fall from favor and unexpected resurrection illuminate both sorokin s life and the tempestuous world of academic politics an outspoken revolutionary and secretary to alexander kerensky sorokin was imprisoned and ordered executed by lenin then reprieved and exiled during the 1920s he flourished as a teacher and scholar at the university of minnesota where he published several pioneering books on the russian revolution social mobility sociological theory and rural sociology harvard president a lawrence lowell was so impressed that he recruited sorokin to chair the university s first department of sociology from 1930 to 1944 the department prospered under sorokin s leadership attracting an entire generation of young scholars who in their own right would have a profound impact on the discipline in this period sorokin published several volumes of his magnum opus social and cultural dynamics and became embroiled in a bitter battle with rival talcott parsons for control of the department parsons ultimately deposed sorokin and transformed sociology into the department of social relations sorokin nevertheless stayed on at harvard where he established the center for creative altruism but otherwise continued to work in relative obscurity finally in 1963 after years in eclipse sorokin was recognized for his accomplishments when he was elected president of the american sociological association during a long and distinguished career sorokin amassed an amazingly diverse and substantial body of work much of which set the standard for the field at the same time he broke with the conventions of sociology frequently ridiculing and taunting his less adventurous colleagues for his heresy the flamboyant sorokin was condemned and driven to the periphery of a profession anxious for legitimacy as a science as a result sorokin s ideas have been consistently ignored and misunderstood for more than a quarter century based on exhaustive research in sorokin s papers and the harvard archives as well as interviews with sorokin s surviving family members former students and colleagues this biography restores sorokin to his rightful place in the pantheon of american intellectuals
