my aim in writing this book is to show that the externalism of the west the prevalent tendency to pay undue regard to outward and visible results and to neglect what is

inward and vital is the source of most of the defects that vitiate education in this country and therefore that the only remedy for those defects is the drastic one of changing our standard of reality and our conception of the meaning and value of life my reason for making a special study of that branch of education which is known as elementary is that i happen to have a more intimate knowledge of it than of any other branch the inside of an elementary school being so familiar to me that i can in some degree bring the eye of experience to bear upon the problems that confront its teachers i do not for a moment imagine that the elementary school teacher is more deeply tainted than his fellows with the virus of occidentalism nor do i think that the defects of his schools are graver than those of other educational institutions in my judgment they are less grave because though perhaps more glaring they have not had time to become so deeply rooted and are therefore one may surmise less difficult to eradicate also there is at least a breath of healthy discontent stirring in the field of elementary education a breath which sometimes blows the mist away and gives us sudden gleams of sunshine whereas over the higher levels of the educational world there hangs the heavy stupor of profound self satisfaction

the balance between individual independence and social interdependence is a perennial debate in japan a series of educational reforms since 1990 including the implementation of a new curriculum in 2002 has been a source of fierce controversy this book based on an extended detailed study of two primary schools in the kinki district of japan discusses these debates shows how reforms have been implemented at the school level and explores how the balance between individuality and social interdependence is managed in practice it discusses these complex issues in relation to personal identity within the class and within the school in relation to gender issues and in relation to the teaching of specific subjects including language literature and mathematics the book concludes that although recent reforms have tended to stress individuality and independence teachers in primary schools continue to balance the encouragement of individuality and self direction with the development of interdependence and empathy

excerpt from what is and what might be a study of education in general and elementary education in particular 1 by self satisfaction i mean satisfaction with the existing system as a system that strenuous efforts are being made to improve the system within its own limits i can well believe but the system itself with the defects and limitations which are of its essence seems to be regarded as adequate and even as final by nearly all who work under it about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

there has been a flurry of writing about teachers as inquirers and researchers as well as books about children as inquirers this volume brings these two areas together teachers and students are inquiring at ridgeway elementary school it demonstrates the importance of thought collectives as forums for student and teacher learning the children in the primary classrooms in this book are working to understand the world around them and their place in it as literate individuals their teachers are studying themselves and the students no other book describes the way this work affects children teachers and the ethos of the school in which the work occurs in that sense this book is groundbreaking in that it is an honest portrayal of the joys and sorrows the successes and the stumbling blocks the clear vision and the obfuscating that teachers live as they enact a life of asking questions being curious wandering and wondering acknowledging and honoring the many faces of inquiry in schools this book demonstrates the children s inquiry their teachers inquiry and the place of that inquiry in schools it lays out the ways in which inquiry is fundamental to teaching and learning in a democracy in which all of the members of the community have a voice in deciding curricular directions and ways of presenting learning teachers are presented as thinkers and learners not merely as technicians enacting others views of what is to be learned and when readers will find teachers dealing with the real issues of life in schools they will see how teachers can use their existing situations as points of departure for their growth and their students learning
