this book is a comprehensive revision guide for the mceM part b examination the content is based on the college of emergency medicine curriculum and provides candidates with a concise and complete guide for exam preparation

clinical trials in neurology comprehensively tackles the methodology and design of clinical trials in neurological disease a general section deals with the ethical aspects drug development and regulatory requirements basic trial designs and the statistics used a diseases section tackles specific aspects of disorders focusing on the relevant ethical issues outcome variables and experience with large multicentre trials

this book is split into two sections the first offers a description of the european resuscitation council whose guidelines form the core of practice and will look at ethical and legal aspects it also addresses the controversial issue of family attendance at resuscitation attempts and offer an analysis of outcomes section two presents the new guidelines and algorithms for basic advanced and paediatric life support key area of nursing practice based on 1997 european guidelines handy size and price quick reference addresses practical and ethical emotional issues

about 550 registrants from 51 different countries attended the seventh ottawa conference on medical education and assessment in maastricht we received 525 abstracts for the conference divided in thematic poster sessions and platform presentations organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous ottawa conferences during and after the conference about 250 papers were submitted for publication in the conference proceedings leaving us little time for a post conference depression despite the large number of papers the editors have attempted to review and edit the papers as care fully as possible occasionally however correspondence exceeded reasonable deadlines preventing careful editing of a small number of the papers although we felt that our editorial task was not quite finished we nevertheless decided to include these papers we thank the many authors for their enthusiastic and prompt response to occasionally tedious editorial suggestions and requests we are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education the editors want to thank jocelyn flippo berger whose expertise with desk top publishing and perseverance was a great help

the book includes terms that are the concern of all nurses and terms that are relevant to specific areas of practice the focused nursing information is supplemented by the inclusion of some applied anatomy physiology important items from the medical and surgical specialties and some basic psychology and sociology numerous in depth entries explore issues rather than just provide a basic definition there are of course a proportion of shorter definitions the intentions are to use references in the in depth entries and provide readers with other sources of information on the topic because the book does not attempt to cover other related areas the opportunity exists to provide comprehensive evidence based information about important nursing issues the style will be dictated by having an a z format but the intention is to highlight material in some of the in depth entries this is achieved with separate practice application boxed items adjacent to the entry entries explore issues rather than giving just a basic definition pocket book format a quick reference covering a wide range of topics it is very nursing focused generously illustrated edited by an experienced nurse editor with a general wide ranging knowledge of nursing combines the best material from a range of proven elsevier publications
