pathogens pesticide or veterinary drug residues heavy metals biotoxins abused food additives illegal food adulterants pops gmos food allergens and food contact material migrants it is therefore of interest for not only analytical investigators and food safety inspectors but also regulatory practitioners and risk assessors in various food science and research fields presents the versatilities of aptamers for food safety quality and compliance provides utilities of aptamers for the analysis of almost all risk factors in foodstuffs includes food quality control and regulatory measures such as haccp mrls proficiency test and uncertainty assessment along with case illustrations

outsourcing has become an increasingly important issue for many organisations this book provides a framework for an up to date understanding of the outsourcing process and the key issues associated with it it integrates a number of contemporary topics including benchmarking buyer supplier relationships organisational behaviour competitor analysis and technology influences the analysis draws upon both empirical research and real case studies the author starts by providing guidelines as to when outsourcing is appropriate and what its implications will be before moving on to explain how outsourcing is implemented the benefits of both successful outsourcing and the risks and consequences of outsourcing failure are outlined the book is ideal for use by postgraduate students studying the area of outsourcing it would also benefit industry managers who are considering outsourcing or who already have outsourcing programmes in place

technology has always played a central role in international politics it shapes the ways states fight during wartime and compete during peacetime today rapid advancements have contributed to a widespread sense that the world is again on the precipice of a new technological era emerging technologies have inspired much speculative commentary but academic scholarship can improve the discussion with disciplined theory building and rigorous

empirics this book aims to contribute to the debate by exploring the role of technology both military and non military in shaping international security specifically the contributors to this edited volume aim to generate new theoretical insights into the relationship between technology and strategic stability test them with sound empirical methods and derive their implications for the coming technological age this book is very novel in its approach it covers a wide range of technologies both old and new rather than emphasizing a single technology furthermore this volume looks at how new technologies might affect the broader dynamics of the international system rather than limiting the focus to a stability the contributions to this volume walk readers through the likely effects of emerging technologies at each phase of the conflict process the chapters begin with competition in peacetime move to deterrence and coercion and then explore the dynamics of crises the outbreak of conflict and war escalation in an environment of emerging technologies the chapters in this book except for the introduction and the conclusion were originally published in the journal of strategic studies
