how can psychology professors in the usa and other nations make their courses more international this question is addressed in this indispensable new sourcebook co authored by 73 contributors and editors from 21 countries in recent decades psychology has evolved from an american dominated discipline to a much more global discipline preliminary estimates by zoma and gielen 2015 suggest that approximately 76 78 of the world s one million or so psychologists reside outside the u s however most textbooks in the field continue to rely predominantly on research conducted in north america and europe our book is intended to introduce psychology instructors to a variety of broad perspectives as well as specific suggestions that can support their efforts to internationalize their course offerings at both the undergraduate and graduate levels in this way they can prepare their students to become more culturally sensitive and function more effectively as citizens and psychologists in the evolving globalized world to achieve these ambitious goals the editors have assembled an international group of 73 distinguished contributors who taken together have taught and conducted research in all regions of the world the chapters in the book include both core areas of psychology and subdisciplines that represent rapidly expanding and internationally important areas such as cross cultural psychology and the psychology of gender the chapters cover key topics and areas included in the course offerings of psychology departments both in the united states and in other countries in addition to a discussion of international perspectives relevant to a given area all chapters include an annotated bibliography of pertinent books articles web related materials films videos and so on based on this information both highly experienced and less experienced psychology instructors can add globally and culturally oriented dimensions to their respective courses this is important because universities departments and accrediting agencies increasingly put pressure on instructors to broaden and internationalize their courses as a long time international psychologist myself i see this bold new volume as a great leap forward for international psychology the 73 distinguished contributors and editors from 21 countries have carefully crafted a handbook that will be the go to resource on the topic for years to come for psychology to continue to be relevant in the 21st century it must become more international i am grateful this book will help us accomplish this challenging but rewarding goal philip g zimbaro ph d past president american psychological association what could be more important than understanding human behavior and the thoughts and emotions that underlie it by teaching psychology to the world we offer the possibility of using our
