the books in this series describe what successful principals must know and be able to do written by teams of nationally recognized experts and accomplished practitioners they include practical materials such as checklists sample letters model forms case studies

and action plans

emphasizes the relevance of legal environment topics to business functions e g marketing finance human resources accounting manufacturing excerpted cases include substantial portions of original language of the court and competing arguments the text presents a strong emphasis on ethics international law environmental law and women s legal concerns

over the last ten years mobile payment systems have revolutionised banking in some countries in africa in kenya the introduction of m pesa a new financial services model has transformed the banking and financial services industry giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in kenya have bank accounts this book addresses the legal and regulatory issues arising out of the introduction of m pesa in kenya and its drive towards financial inclusion it considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity this is done with a view to understanding the regulatory capacity of kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion it also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the central bank of kenya has taken in addressing the legal and regulatory issues presented by mobile payments the book argues there are significant

gaps in the regulatory regime of mobile banking in kenya

this timely and original book provides an exploration of the factors that combine to determine the form of regulatory problems and the overall success or failure of regulation using environmental regulation as a basis for analysis this book puts forward a theoretical framework for the design of effective regulation and demonstrates how businesses compliance with environmental regulation in particular could be improved the authors address previous shortcomings in regulatory explanations which have frequently overlooked the structural character of regulation and underplayed how the factors involved work together to determine regulatory shape and performance in seeking to address this deficit the authors develop a compliance line to demonstrate how different choices on how to regulate will affect compliance outcomes chapters include a review of how regulation has changed and sought to improve over the years the relationship between rule following and regulation how regulation incorporates and relies on necessary conditions an identification of the trade offs involved in regulating and a discussion of why regulation is by necessity and to a degree unfair providing theories for how regulation can be structured to improve compliance the structure of regulation will be a key resource for students and academics in the fields of law and regulation environment studies public policy and political science

the oecd has collectively underlined the importance of a high quality regulatory environment since the mid 1990s when the council adopted the 1995 recommendation on improving the quality of government regulation and its checklist as the first

this book brings satisfying definition and clarity to this field at last exploring the substantive differences between competition law and sector specific regulation after the methodological integration it presents the first detailed analysis of the many hundreds of notifications and commission letters generated under the article 7 procedure identifying the most relevant cases dealing with market definition market power and remedies it compares these decisions with relevant competition law cases and highlights elements with a bearing on sector specific regulation it also offers hugely valuable guidance through the vast amount of documents in the commission's circa database topics and issues raised include the following definition of product markets delineation of geographic markets including sub national different practices in relation to assessing single market power and collective market power and competition problems such as refusal to deal margin squeeze non price discrimination and excessive pricing there can be little doubt that this is the new reference point for researchers and practitioners in this domain by systematically categorizing the concepts and legal criteria and building a solid theoretical framework on the intersection of competition law and sector specific regulation the author has created a resource that is sure to be welcomed by all those involved in regulation of electronic communications markets and network industries in general academic scholars telecommunications regulators at the eu and member state levels competition authorities law firms specializing in it communications law practitioners in it and telecommunications companies and consultants in the sector the book will also prove very useful for scholars and practitioners in other parts of the world interested in comparing the eu system with their own

the legal and regulatory environment of business 2nd clearly demonstrates the relationships and importance of legal principles in business today the text uses a unique organization to parallel legal concepts to each major business function rather than isolating principles such as antitrust law this new paradigm allows students to see the relationship of the principles to the marketing and organization functions of business

using two typical college students bill and ann as examples this textbook applies legal concepts to practical business situations with extensive coverage of employment and labor law and the legal steps necessary to start a business

contributing to a convergence of legal and economic approaches the economics of antitrust and regulation in telecommunications integrates economic theory into current eu antitrust policy within the sector the book addresses the role of competition and regulatory policies on a number of key issues in telecommunications such as market definition collective dominance access to networks and allocation of scarce resources

this toolkit is to offer a practical methodology to government officials and staff from development organizations on how to identify and assess laws and regulations that affect international trade and investment in the services sector
