the main purpose of this book is to bring together some description of the skills and attitudes of those working in the hospice units specializing in terminal care with those rather different but overlapping skills used daily in the palliation of chronic or incurable disease this varied collection of papers does not pretend to be exhaustive among the omissions for example are two major causes of deat chronic respiratory disease and stroke this is because the treatment of the end state of these conditions and they are not alone in this lies more in the gentle withdrawal of measures no longer appropriate rather than in any positive regime within the gift of the physician this may lead on occasion to an unjustifiable diminution of interest but this is less likely in cases of cardiac or malignant disease ischaemic heart disease remains the main killer of the western world we may see important changes in our approach over the next decade as we document slowly and painstakingly the comparative

ineffectiveness of our therapy but in cases of progressive cardiac disease no matter how we may argue as to management or prevention we are agreed that we must lighten the dreary burden of illness as effectively as possible

now in its fifth edition crofton and douglas s respiratory diseases has firmly established itself as the leading clinical textbook on diseases of the chest presented for the first time as a two volume set this classic text has been completely rewritten and greatly expanded extensive revisions ensure that these volumes present an up to date review of all aspects of lung disease the contributions of some 18 leading authorities ensure that each area is comprehensively covered and new to this edition are chapters on the genetics of lung disease smoking air pollution sleep apnoea diving lung transplantation and medico legal aspects the changes in content reflect the pace of change in the areas concerned not only in terms of understanding of the disease processes but also their treatment the single chapter on asthma that appeared in previous editions has now been expanded into three chapters covering epidemiology mechanisms and management reflecting the enormous research effort currently underway following a marked increase in the incidence of this disease in recent years this new edition continues to provide an excellent reference both for the trainee and specialist in respiratory medicine as well as the general physician it will be extremely useful on the ward and in the office where clinical problems arise and questions are asked which need clear answers

clinical skills are a fundamental aspect of nursing care of children and young people the great ormond street hospital manual of children s nursing practices is an evidence based manual of practical skills in children s nursing which builds on the extensive expertise developed at great ormond street hospital it encompasses all aspects of children s nursing from the most basic aspects of everyday practice to advanced practice in high dependency and intensive care to provide a comprehensive resource for all qualified nurses students and other health care professionals involved in caring for children both in the hospital and the community setting children s and young people s nursing presents unique challenges the great ormond street hospital manual utilises the latest clinical research and expert clinical knowledge to address these challenges and provides the underlying theory and evidence for nursing care of children it provides a definitive guide to clinical skills procedures in children s and young people s nursing which enables nurses working with children and young people to practice confidently and deliver clinically effective family centred care key features offers access to clinical procedures developed through the extensive expertise from great ormond street hospital contains evidence based recommendations for expert care encompasses all aspects of children s care contains procedures guidelines students can rely on and effectively use in practice following qualification highlights specific needs of neonates and adolescents placed in the context of inter disciplinary care of the child includes the rationale for each procedure the why as well as how information presented in a similar way to the royal marsden manual of clinical nursing procedures offering continuity to those working in both adult and paediatric settings this title is also available as a mobile app from medhand mobile libraries buy it now from itunes or the medhand store

a superbly detailed presentation offering a wealth of practical guidance encompasses epidemiology incidence cause pathology diagnostic procedures therapy and clinical features for the entire spectrum of childhood neoplasms helps the reader in diagnosing malignancy recognizing and treating life threatening complications and in tailoring therapy to the individual based on age tumor histology stage of disease and a variety of other prognostic features
