sharks are in trouble fifty shark species are at high risk of extinction and another sixty three are threatened these intelligent mysterious and sometimes scary fish evolved about 420 million years ago they have adapted to survive deep in the ocean and in shallow water habitats commercial fishing and finning are threatening shark populations so is water pollution marine biologists and others including young people are working together to save these fascinating predators discover the work of scientists and conservationists as they study shark biology and morphology research migration feeding and mating patterns delve into human climate and other threats to shark habitat and develop sophisticated technologies to aid sharks and shark research see how scientists also educate the public about real and imagined fear of sharks and encourage citizen participation in shark conservation efforts learn about high tech tagging for tracking shark migration paths discover the autonomous underwater vehicles and drones that divers use to observe and photograph sharks up close visit shark sanctuaries in the south pacific ocean you ll even meet the shark lady a k a eugenie clark a pioneer ichthyologist shark scientist through research and advocacy people around the world are working to protect and admire sharks a n engaging well researched book about a much maligned species of fish that deserves our protection booklist a remarkably thorough tour of the world of sharks and marine scientists efforts to educate the public about our ocean s apex predators kirkus reviews

they both live in the ocean they are both large gray and eat fish but one is a shark and the other is a dolphin how do you know which animal is which award winning children s author melissa stewart explains a few of the many differences between these animals stewart s simple text is paired with stunning underwater photography to show readers just how different these animals really are

Britain's interest in the northwest coast of America had been enlivened during the late eighteenth century showing little regard to Spain's blanket claim for the whole coast from Cape Horn to the very north of America. Britain was determined to establish as their own claim to the fur trade and whaling industry. Tensions arose between the two countries and Britain mobilised her fleet in preparation of hostilities. Breaking out this became known as the Spanish Armament. Tensions eased by negotiation and Britain gained equal trading rights and posts on the northwest coast north of any Spanish settlements. This became known as the Nootka Sound Agreement. An expedition was prepared with two ships. Fitting out George Vancouver was given command. His professionalism in chart and surveying work during his time in the West Indies noted by the Admiralty. The expedition sailed on All Fools Day 1791 and returned 17th September 1795. Although Vancouver suffered from acute ill health a thorough survey of the southwest coast of Australia and the whole west coast of America from just north of San Francisco to the Aleutian Islands was undertaken. He carried out the diplomatic meeting with the Spanish Commissioner on the terms of the Nootka Sound Agreement and negotiation with the Hawaiian chiefs for the islands to become a protectorate of Great Britain. Alas for all these credible achievements he was never recognised until long after his death. Book reviews online published on the Bestsellers website.

After a working life at sea of some 35 years one might think it would be time to swallow the anchor and retire to a peaceful existence on shore. However for the author such an existence was not to be. This book relates experiences of a nautical nature by a retired captain of very large crude carriers.

This book offers cutting edge insights into the changing landscape of entrepreneurial finance as digital technologies play an increasingly dynamic role in the world economy. Assessing the rapid development of innovative technologies in entrepreneurial ecosystems it contributes to a wider discussion on the role that technology plays in facilitating and commercializing ideas in the context of global finance.

Discusses endangered animals throughout the world including coral reef, bees, bats, marine turtles, wolves, sharks and frogs and what can be done to help save them. Provided by publisher.
