the mosaic of atonement offers a fresh and integrated approach to historic models of atonement while modern treatments of the doctrine have tended toward either a defensive hierarchy in which one model is singled out as most important or a disconnected plurality in which multiple images are affirmed but with no order of arrangement this book argues for a reintegration of four famous pieces of atonement doctrine through the governing image of christ shaped mosaic unlike a photograph in which tiny pixels present a seamless blending of color and shape a mosaic allows each piece to retain its recognizable particularity while also integrating them in the service of a single larger image if one stands close one can identify individual squares of glass or tile that compose the greater picture and if one steps back there is the larger picture to be admired yet in the great mosaics of age old christian churches the goal is not for viewers to construct the image as in a puzzle but to appreciate it so too with this mosaic of atonement doctrine while no one model is set above or against the others the book notes particular ways in which the pieces the feet heart head and hands mutually support one another to form a more holistic vision of christ s work this is my body jesus said to his followers and by reintegrating these oft dismembered aspects of atonement we will note fresh ways in which it was given for us
