urban history starts in ancient mesopotamia in this volume marc van de mieroop examines the evolution of the very earliest cities which for millennia inspired the rest of the ancient world the city determined every aspect of mesopotamian civilization and the political and social structure economy literature and arts of mesopotamian culture cannot be understood without acknowledging their urban background urban history starts in ancient mesopotamia the earliest known cities developed there as the result of long indigenous processes and for millennia the city determined every aspect of mesopotamian civilization marc

van de mieroop examines urban life in the historical period investigating urban topography the role of cities as centres of culture their political and social structures economy literature and the arts he draws on material from the entirety of mesopotamian history from c 3000 to 300 bc and from both babylonia and assyria arguing that the mesopotamian city can be regarded as a prototype that inspired the rest of the ancient world and shared characteristics with the european cities of antiquity

the roots of our modern world lie in the civilization of mesopotamia which saw the development of the first urban society and the invention of writing the cuneiform texts reveal the technological and social innovations of sumer and babylonia as surprisingly modern and the influence of this fascinating culture was felt throughout the near east early mesopotamia gives an entirely new account integrating the archaeology with historical data which until now have been largely scattered in specialist literature

no one can plausibly deny that the religious development of the peoples of canaan and indeed of all the ancient world around the eastern mediterranean to the indus river were affected by the cultural and religious developments in mesopotamia the centre of the region and a fertile region second to none known in the world on a par with the Nile around which another major civilization arose this is a text of history of mesopotamia in its own right by the time history gets back this far the lines become very blurred rather like parallel lines intersecting on the horizon literature religion archaeology sociology psychology all of these disciplines become intertwined in Jacobsen's text as he looks at Sumerian society the book is organized with an introduction then according to time divisions of fourth third and second millennia then concludes with an epilogue into the first millennium during which the Bible as we know it and most ancient history such as is commonly known occurred came to be

people so great it is unfortunate that their accomplishments and contributions not only to mesopotamian civilization but to civilization in general largely go unnoticed by the majority of the public perhaps the sumerians were victims of their own success they gradually entered the historical record established a fine civilization and then slowly submerged into the cultural patchwork of their surroundings among the many cities of the ancient world rome and athens may come to mind first but the city of babylon in the land of mesopotamia was already an ancient venerated city when the others were still inconsequential settlements today babylon has become a byword for greed excess and licentiousness mostly due to its mention in the bible but a closer examination reveals that babylon was so much more and even perhaps the most important city in the ancient world ancient babylon was home to great dynasties that produced some of the world's most influential leaders most notably hammurabi and nebuchadnezzar and these rulers invoked their wills on the entire ancient near east and have been remembered as both progressive and cruel all at the same time babylon was also the seat of culture in ancient mesopotamia and the place where scholars made amazing scientific advances that would not be eclipsed for several centuries an examination of ancient babylon demonstrates that it was truly the first great city in the ancient world compared to some of their contemporaries including the egyptians assyrians and babylonians the hittites were somewhat distant both culturally and geographically the hittites were an indo european speaking in an ocean of afro asiatic and semitic groups their homeland was to the north of mesopotamia and it contained no major river like the nile tigris or euphrates rivers the hittite empire was also far less enduring than its neighbors as it only existed from about 1800 1200 bce van de mieroop 2007 156 which was considerably shorter than most of the other major kingdoms of the near east with that said the influence of the hittites on the politics economy and overall situation of the ancient near east cannot be understated the hittites were a force to be reckoned with while they existed although the biblical accounts of the assyrians are among the most interesting and are often corroborated with other historical sources the assyrians were much more than just the enemies of the israelites and brutal thugs a historical survey of ancient assyrian culture reveals that although they were the supreme warriors of their time they were also excellent merchants diplomats and highly literate people who recorded their history and religious rituals and ideology in great detail the assyrians like their other neighbors in mesopotamia were literate and developed their own dialect of the akkadian language that they used to write tens of thousands of documents in the cuneiform script this book looks at all four of these highly influential empires along with pictures depicting important people places and events you will learn about the greatest civilizations of ancient mesopotamia like never before

exploring life death and the afterlife in mesopotamia alhena gadotti and alexandra kleinerman examine how life and death experiences continually developed over the course of nearly three millennia of mesopotamian history to achieve this the book follows the life cycle of the people of the tigris and euphrates river valleys from 3000 bce to 300 bce from birth through death and beyond this book is the first to interrogate the relationships between living and dying through case studies and primary evidence including letters written by both women and men the book allows readers to enter the minds of the ancients first the authors focus on life through topics such as the rituals surrounding birth marriage and religion the authors then examine the common causes of death the rituals associated with death and the mesopotamian views of the netherworld its gods and inhabitants concepts of gender fluidity both in life and death are considered alongside evidence from epigraphic data illustrating daily life as a multifaceted subject affected by time space location socioeconomics and gender this book creates a window into the conditions and concerns of the mesopotamian people

this volume is about the history literature ritual and thought associated with ancient mesopotamian witchcraft with chapters on the changing forms and roles of witchcraft beliefs the ritual function form and development of the maqlû text the most important ancient work on the subject and the meaning of the maqlû ceremony as well as the ideology of the final version of the text the volume significantly contributes to our understanding of the maqlû text and the reconstruction of the development of thought about witchcraft and magic in mesopotamia

modern day archaeological discoveries in the near east continue to illuminate man s understanding of the ancient world this illustrated handbook describes the culture history and people of mesopotamia as well as their struggle for survival and happiness

the recent reopening of iraq s national museum attracted worldwide attention underscoring the country s dual image as both the cradle of civilization and a contemporary geopolitical battleground a sweeping account of the rich history that has played out between these chronological poles from mesopotamia to iraq looks back through 10 000 years of the region s deeply significant yet increasingly overshadowed past hans j nissen and peter heine begin by explaining how ancient mesopotamian inventions including urban society a system of writing and mathematical texts that anticipated pythagoras profoundly influenced the course of human history these towering innovations they go on to reveal have sometimes obscured the major

role mesopotamia continued to play on the world stage alexander the great for example was fascinated by babylon and eventually died there seventh century muslim armies made the region one of their first conquests outside the arabian peninsula and the arab caliphs who ruled for centuries after the invasion built the magnificent city of baghdad attracting legions of artists and scientists tracing the evolution of this vibrant country into a contested part of the ottoman empire a twentieth century british colony a republic ruled by saddam hussein and the democracy it has become nissen and heine repair the fragmented image of iraq that has come to dominate our collective imagination in hardly any other continuously inhabited part of the globe can we chart such developments in politics economy and culture across so extended a period of time by doing just that the authors illuminate nothing less than the forces that have made the world what it is today
