It is recommended that at-risk and older drivers in Arizona be tested for vision through a newly designed system of measures provided by two automated tests to test vision condition and function and one driving simulator to assess eye status. Hence, it is integrated into a larger system and additional recommendations are provided as these relate to motor vehicle operation skills and cognition. These automated systems and methodologies may ultimately serve as a prototype of transportation license testing improvements for all other states, countries, and agencies (e.g., aviation, rail, maritime, commercial vehicles, etc.). To follow such techniques may also reduce the incidence of fraudulent schemes and issuances of driver's licenses, commercial driver's licenses, and hazardous materials transportation licenses.
