developing countries have undergone significant industrialization in the last

three decades yet industrial growth reveals marked spatial inequalities in terms of both country and location the newly industrialised countries have achieved spectacular growth in sharp contrast to many other countries of the south industrial structure has changed moving away from labour intensive industries to more technologically advanced manufacturing developing countries have had considerable success in penetrating developed country markets but they are now encountering more market restrictions the role of the government in the development of the economy is also changing increasingly countries are turning towards export orientated industrialization strategies and privatization whilst their governments are emphasising their facilitative role

originally published in 1992 this title came out of a conference on emotion and cognition as antecedents and consequences of health and disease processes in children and adolescents the theoretical rationale for the conference was based on the assumption that the development of emotion cognition health and illness are processes that influence each other through the lifespan and that these reciprocal interactions begin in infancy the chapters discuss developmental theories research and implications for interventions as they relate to promoting health preventing disease and treating illness in children and adolescents
