code generation concepts tools techniques is based upon the proceedings of the dagstuhl
 workshop on code generation which took place from 20 24 may 1991 the aim of the workshop
 was to evaluate current methods of code generation and to indicate the main directions which
 future research is likely to take it provided an excellent forum for the exchange of ideas and
 had the added advantage of bringing together european and american experts who were
 unlikely to meet at less specialised gatherings this volume contains 14 of the 30 papers
 presented at the dagstuhl workshop the papers deal mainly with the following four topics
 tools and techniques for code generation code generation for parallel architectures register
 allocation and phase ordering problems and formal methods and validations most of the
 papers assess the progress of on going research work much of which is published here for
 the first time while others provide a review of recently completed projects the volume also
 contains summaries of two discussion groups which looked at code generation tools and
 parallel architectures as a direct result of one of these discussions a group of the participants
 have collaborated to make a pure burs system available for public distribution this system
 named burg is currently being beta tested code generation concepts tools techniques provides
 a representative summary of state of the art code generation techniques and an important

assessment of possible future innovations it will be an invaluable reference work for researchers and practitioners in this important area
